Light Cove

Product Description

Extruded aluminum light cove provides an economical, durable and handsome solution to cove drywall detailing. Extruded aluminum offers key advantages over more traditional materials such as drywall or fiberglass reinforced gypsum. Consistency of shape, ease of installation, strength and an internal positive locking splice insure perfect and easy alignment every time. Mounting brackets provide a shelf for light fixtures. All Gordon light cove products are stocked for immediate shipment.

Sizes

Light coves are stocked in a 6 inch radius. Gordon will be delighted to quote any custom design.

Finishes

Gordon coves are precoated with a protective chemical coating compatible with plaster, latex, polyurethane epoxy, enamel, and drywall mud. Light coves may be field painted along with the drywall or factory finished in custom colors.

Installation

Factory pre-fabricated and welded corners provide a complete seamless system. Mounting brackets and splice plates at joints are provided for perfect alignment and easy installation. Some profiles hang without drywall flanges and others have taping flanges for tape and drywall mud.

Drawings

Shop drawings are available upon request for all custom aluminum light cove projects.
