Aluma-Vault

Product Description

A metal ceiling system which is curved, freeformed and vaulted. The aluminum panel surface is available perforated with a sound insulating pad. Aluma-Vault features easily installed snap-on batten covers to conceal fasteners and create an integrated or contrasting aesthetic. A unique suspension system is combined with aluminum panels to develop a non-modular curved ceiling solution.

Sizes

The system can be provided as a partial or complete barrel vault, curved to virtually any radius and provided virtually any length or width. Normal widths are usually 3 to 10 feet.

Finishes

Available in standard factory finishes or custom colors if required.

Installation

Aluma-Vault is simple and economical to install. Panels are screwed into place, batten strips snap on to conceal screws. All components are pre-cut which eliminates the need for field fabrication.

Drawings

Shop drawings are available upon request for all Aluma-Vault projects.

Guide Specification

Suspension system shall be Aluma-Vault, manufactured by Gordon, Inc., P.O. Box 4347, Shreveport, LA 71134. Suspension components to be of 6063-T5 aluminum alloy.
