MR-MANUFACTURER

For more than a half century, Buchtal has developed ceramic tile with the design industry in mind. And over the years, that creative partnership has grown, along with our reputation for quality, innovation and versatility.

Today, our modular lines of glazed and unglazed tiles in virtually any color, size and surface offer unmatched design flexibility. And our advancements in pool and facade technology have placed us at the forefront of the industry.

All Buchtal products are represented by our highly qualified independent sales force and backed by outstanding technical assistance and customer service. And on-time product delivery is assured through our nationwide company warehousing and extensive distribution network.

PP-PRODUCT PRESENTATION

Aesthetically Pleasing and Technically Sophisticated Approaches To Pool Design

Whether you're planning a residential retreat, a hotel pool, an olympic venue, or a therapeutic spa, Buchtal pool ceramics are the fabulously functional choice. Of course, they're hygienic. Chemical-resistant. And weather-resistant.

But the glazed surfaces of Buchtal ceramics add so much more. They lend sparkle to the water and create optical charm, through color, texture, shape and illusion. For instance, dark blue glaze appears to extend shallow depths. While a pale glaze makes water seem crystal clear.

Buchtal's advanced pool trim offers alternative overflow channels, barefoot slip-resistant tiles, depth markers, hand-hold tiles, and vertical-flow systems. These special trim pieces have been used in combination with our glazed and unglazed tile lines to create pools throughout the world.

We also offer design assistance from our pool experts, in the form of preliminary working drawings which can easily be modified for U.S. codes.
