#### Cast marble floor tiles, created for a lifetime of beautiful performance.

Since 1983, PermaGrain has committed itself to becoming the leading producer of cast marble tile products in North America. The Permétage line of stone products was the first to be introduced to the U.S. market, through imports from France. Permétage production in the U.S. was begun in early 1986. The next step was the acquisition of the Armstone product line from Armstar in 1992. Since then, PermaGrain has expanded the Armstone offerings with the addition of two completely new ranges, and the re-styling of the original Armstone line.

PermaGrain's current line-up of cast marble tile includes two product groups – Armstone and Permétage – and a total of six distinct product ranges:

**Armstone® Classic 2000** in a classic granite-look tile with eighteen great contract colors to choose from.

**Armstone® Treasure** presents the finer appearance of sandstone in ten distinctive colorways.

**Armstone® SPLASH!** came from a bright idea to add some recycled plastic to basic white and black tile to create bursts of color.

**Armstone® Confetti** is a festival of color in a recycled tile offered in eight playful colors.

**Permétage® Portfolio** adds understated beauty to spaces with selections from a range of eighteen high-style colors.

**Permétage® Travertine** provides the timeless appeal of classic quarried travertine marble without the fuss, in six rich colors.

For additional information on any of our products or services, please refer to our printed Sweet's catalog, or visit our site on the World Wide Web at [www.permagrain.com](http://www.permagrain.com), or send your e-mail request for information, literature or product samples to [customerservice@permagrain.com](mailto:customerservice@permagrain.com)
