Fifteen years of proven performance in diverse applications.

The Armstone line of cast marble products has proven itself time and again to be a lasting, elegant performer in applications as diverse as shopping malls, airports, restaurants, hotels, office lobbies, department stores and specialty shops, as well as residential kitchens and bathrooms. The use of hard Tennessee marble in combination with high-technology resin creates tile with deep rich visual appeal and a rugged personality.

Playful and exuberant... yet responsible.

If you are searching for a floor full of life, you have found it in Armstone Confetti. Created from a blending of classic colors, Confetti creates a festive feeling you won't find elsewhere. Confetti has its serious side as well, being a largely recycled product, its light-hearted colors being born of material normally considered disposable waste. Confetti utilizes aggregate from damaged or otherwise unacceptable Armstone and Permétage production material to create its range of eight colors.

Confetti is now available in the three standard Armstone finishes – Polished, Honed, Textured – and the full range of 3/8" (10 mm) gauge tile sizes, from 8" x 8" (200 mm x 200 mm) up to 24" x 24" (600 mm x 600 mm). It may also be specified with one of the Dimensions in Armstone multi-textural pattern options for further design enhancement. For a full listing of available colors and sizes, please refer to the table provided in the "Cast Marble Floor Tiles" screen.

Stylish versatility for almost any space.

Whether your project includes simply floor tile, or a wider range of other stone materials, Armstone Confetti most likely can be provided to your exact needs. Armstone is available in both 3/8" (10 mm) tile and 3/4" (20 mm) gauge panels. Panels may be either untrimmed for on-site fabrication use, or provided trimmed to an exact 48" x 48" (1220 mm x 1220 mm). Panel material may also be bonded together to form thicker shapes, or combined with tile gauge pieces to create more intricate pieces such as column surrounds, fountain caps or planter facings. Full custom fabrication facilities are available, with capabilities including edge detailing, engraving, inseting of logos or other designs in stone or metal, and panel bonding. Please contact your local Armstone distributor, or PermaGrain directly for a quotation on your fabrication needs.

Sensitive and safe.

Armstone Confetti, as are all PermaGrain flooring surfaces, is classified by Underwriters

Laboratories as to slip resistance, and meets all current requirements set forth by the Americans with Disabilities Act (ADA) for accessible routes. Armstone is also classified as a Class A flooring surface (ASTM E-84).
