A new idea with fifteen years of proven performance.

The Armstone line of cast marble products has proven itself time and again to be a lasting, elegant performer in applications as diverse as shopping malls, airports, restaurants, hotels, office lobbies, department stores and specialty shops, as well as residential kitchens and bathrooms. The use of hard Tennessee marble in combination with high-technology resin creates tile with deep rich visual appeal and a rugged personality.

Dashing design excitement.

The exciting Armstone SPLASH! appearance is created using exclusive technology to blend colorful recycled plastic chips into Armstone Classic 2000 black and white tiles. The result is a uniquely different floor tile to put some real pizzazz into any space.

Armstone SPLASH! is offered in two color options, either bright, bold 078 Caribbean (white) or subtle, softer 072 Arabian (black).

Armstone SPLASH! is available as Polished floor tile in a 3/8" (10 mm) gauge, 12" x 12" (300 mm x 300 mm) format. Specify one of the three Dimensions in Armstone multi-textural patterns for added design enhancement. SPLASH! may also be ordered as trimmed or untrimmed 48" x 48" (1200 mm x 1200 mm) slabs for fabrication work.

Bold versatility.

Whether your project includes simply floor tile, or a wider range of other stone materials, Armstone SPLASH! most likely can be provided to your exact needs. SPLASH! is available in both 3/8" (10 mm) tile and 3/4" (20 mm) gauge panels. Panels may be either untrimmed for on-site fabrication use, or provided trimmed to an exact 48" x 48" (1220 mm x 1220 mm). Panel material may also be bonded together to form thicker shapes, or combined with tile gauge pieces to create more intricate pieces such as column surrounds, fountain caps or planter facings. Full custom fabrication facilities are available, with capabilities including edge detailing, engraving, inseting of logos or other designs in stone or metal, and panel bonding. Please contact your local Armstone distributor, or PermaGrain directly, for a quotation on your fabrication needs.

Bright safety.

Armstone SPLASH!, as are all PermaGrain flooring surfaces, is classified by Underwriters Laboratories as to slip resistance, and meets all current requirements set forth by the Americans

with Disabilities Act (ADA) for accessible routes. Armstone is also classified as a Class A flooring surface (ASTM E-84).
