When you want not just aesthetics, but greater impact resistance and a tackable surface as well, choose the PS-90ALD. It offers the identical properties of the PS-80AL, but adds a molded 1/8" fiberglass hardboard that helps it stand up to the punishment of heavy traffic areas. It's available in 1-7/16" or 2-7/16" thicknesses and dimensions greater than 48" x 120" when required.

INSTALLATION: PS-90ALD and PS-80AL panels may be affixed with factory installed Z-clips, hook and loop fasteners, acoustical adhesives, or magnets (leveling angles provided). Fabric can be removed or replaced for cleaning, recovering or modification.
