### **Surface Textures**

- A. Textured (TXT)
- B. Embossed (EMB)
- C. Smooth

### **Synthetic Colors**

- A. Light Blue
- B. Grey Blue
- C. Light Grey
- D. Dark Grey
- E. Green
- F. Dark Green
- G. Beige
- H. Oxide Red

### **Line Paints**

- A. Yellow
- B. White
- C. Red
- D. Green
- E. Blue
- F. Black

### **Bringing Two Disciplines Together**

The Wood/Synthetic Combi Systems support the many activities going on in your facility. For basketball, volleyball and aerobics, the Rezill Panel wood system provides the ultimate in uniformity. For tennis and track, the ElastiPlus® synthetic system offers durability and easy maintenance. Usual arrangements include installing the wood floor in the center of the facility with the synthetic floor surrounding it, or using the wood floor for one part of the facility and the synthetic floor for the other part to maximize your facility's use.

Both the wood and synthetic floor systems are installed over a suspended subfloor. This puts the two types of floors at the same level to prevent tripping and ensure safety.

**For our synthetic flooring, you can select from a variety of options.**
