#### **Acrylic impregnated engineered plank flooring for demanding heavy traffic applications, with a Limited FULL LIFETIME Wear and Defects Warranty.**

With the introduction of Timeless Series II, PermaGrain set the design and performance standards for acrylic impregnated engineered hardwood plank flooring. It has proven itself in countless demanding installations around the world, where both durability and lasting beauty are of equal importance. It has found success in applications as diverse as shopping malls, airports, convention centers, department stores and specialty retail shops, hotel and office lobbies, elevators, restaurants, dance floors, churches, government and other institutional buildings.

#### **Engineered for a lifetime of service.**

Timeless Series II use the same acrylic impregnation process first developed by PermaGrain some 30 years ago. In the process, liquid acrylic is evenly forced into the pore structure of select hardwoods, and then permanently hardened. The finish, therefore, is as deep as the wood itself, is highly resistant to abrasion and impact, and never requires refinishing. The installed product provides an uncommonly durable floor that is easy to care for, and may have damaged areas repaired easily, while presenting an aesthetic appeal with a deep lustrous look which cannot be duplicated with surface applied stains and finishes.

Additionally, Timeless Series II is engineered with a 3-ply cross-lamination process that insures maximum stability in above, on, or below grade installations. Its low 5/16" (8 mm) profile is ideally suited for both new and renovation projects. The micro-bevel edge technology provides Timeless Series II with a clean, linear look while quietly defining each plank.

Beautiful design and rugged engineering are only part of Timeless Series II's appeal to designers and owners. It is fully backed by PermaGrain's exclusive Limited FULL LIFETIME Wear and Defects Warranty, as well as being fully classified by Underwriters Laboratories as to slip resistance, while meeting or exceeding all current ADA requirements for accessible routes. Timeless Series II may also be specified with a Class B (ASTM E-84) flame spread rating for those public or other areas which may require such protection.

#### **Pick a color... any color!**

Timeless Series II is presented in an astounding array of twenty-five colors in five different species of select North American hardwoods, all obtained from sustainable sources. Available are Northern Red Oak, classic clear Northern Maple, finely grained Tupelo, luxurious, deeply hued Lindenwood, and the warmth of traditional American Cherry. Each specie is produced in a pallet

of colors carefully designed to bring out the full beauty of nature inherent in each.

Each specie/color combination of 2-3/4" (70 mm) wide Timeless Series II may be specified in three length formats – Random Plank (12" - 46" / 305 mm - 1170 mm) , Plank (nominal 46" / 1170 mm) and Slats (16-1/2" / 419 mm). Custom sizes may also be specified at additional cost.

PermaGrain offers Reducer Strips (R/S), and Stair Nosings (S/N) in fully impregnated form to complement available flooring choices.

Refer to the table provided in the “Natural Hardwood Flooring” screen for a complete listing of colors and species available, as well as pattern and size options and all applicable specifications and standards. Also listed are other PermaGrain technical publications which may be of interest.
