

Altro Floors

A Division of Altro Limited

PRODUCT DESCRIPTION

Basic Uses

Altro sheet vinyl safety flooring system can be installed wherever slips and falls are most likely to occur in interior floor areas. It is the ultimate safety flooring system that can help solve the problems of slips and falls. Altro safety flooring meets and exceeds the current published slip resistance requirements of the ADA and OSHA as listed in A4.5 Ground and Floor Surfaces, Bulletin No. 4. Tests were performed in accordance with ASTM Test Method Standard D-2047 James Slip Test for wet and dry conditions. Shoe Material - Official Test Leather. It is important to remember that suitable floor maintenance also plays a vital part in underfoot safety.

Composition and Materials

Altro safety flooring is a combination of high quality vinyl, aluminum oxide and color quartz grains throughout the thickness, silicon carbide grains in the surface layer and a non-woven polyester/cellulose backing with glass fiber reinforcement. Meets the current requirements of ASTM F-1303-95 Type I Grade 1 Class A Backing.

Hygiene

A bacteriostat is incorporated in the flooring to give the exposed surface excellent anti-bacterial activity against both gram-positive and gram-negative micro-organisms of hygienic importance, together with protection against fungal activity.
