

## **ABOUT FLEXCO PRODUCTS**

Flexco has designed and produced outstanding flooring products to meet a wide variety of commercial uses for over two decades. Our many flooring products are produced in a modern plant facility under exacting quality control standards for materials and workmanship. The result: products of superior quality and attractive appearance.

The Flexco product line includes:

### **Rubber Products**

- Radial® Rubber Tile
- Radial® II Rubber Tile
- Square<sup>2</sup> Rubber Tile
- Assurance Plus™ Rubber Tile
- Flex-Tuft™ Rubber Tile
- Smooth Rubber Tile and Sheet Rubber Flooring
- Metro-Flex® Transit Flooring
- Wallflowers Molded Rubber Cove Base
- Rubber Stair Treads and Accessories
- Rubber Stair Treads and Landing Tiles for the Visually Impaired

### **Vinyl Products**

- Contract Solid Vinyl Tile
- Appeal Vinyl Tile
- Granite Dimensions Vinyl Tile
- Vinyl Cove Base
- Vinyl Stair Treads and Accessories

### **Conductive Vinyl Tile and Static Dissipative Vinyl Tile**

- Conductive Vinyl Tile
- Static Dissipative Vinyl Tile

### **Installation Systems**

- Unitized Tile/Heat Welded Installation
- Feature Strips

Flexco products, manufactured in Tuscumbia, Alabama, are distributed nationally and internationally through 130 distributors.

Flexco Company is proud of its reputation for successfully pioneering innovative solutions to complicated flooring installations.

For more information about Flexco Company or Flexco products, write to: FLEXCO, P.O. Box 553, Tuscumbia, AL 35674. Call toll free 800-633-3151 or 205-383-7474; Fax 800-346-9075 or 205-381-0322, or call our distributors as listed in this showcase.

## **MORE ABOUT FLEXCO PRODUCTS**

### **RADIAL® RUBBER TILE**

Designed for use in areas where safe footing is required, this unique tile is compounded for superior resilience and traction. 1" diameter raised studs increase traction by allowing dirt and spilled liquids to drain off the walking surface - reducing the hazards of slipping. Its high profile (.050" raised disk) is recommended especially for heavy traffic areas such as showrooms, shopping centers, ramps, air terminals, elevator lobbies and stair landings. The low profile (.025" raised disk) is recommended for areas with vehicular traffic, such as retail and healthcare. Matching stair treads and accessories are available in each Radial® color selection.

### **RADIAL® II RUBBER TILE**

An extra-resilient rubber compound makes this attractive tile a perfect choice for any commercial flooring application where endurance is key to the performance benefits. The 1-1/4" diameter raised studs of the tile are beveled to provide increased traction and ease of maintenance. Plus, Radial® II provides impressive comfort underfoot while creating an innovative design alternative for high traffic interiors. It's contemporary color palette and matching stairway systems assure a consistent, quality look over the life of the floor. Matching stair treads and accessories are available in each Radial® II color selection.

### **SQUARE<sup>2</sup> RUBBER TILE**

Designed for high traffic areas where functional good looks are required, this geometric shape in textured rubber flooring presents a versatile design dimension for modern interiors. The 1-1/2" raised square studs are molded into a special compound of tough, extra-resilient rubber to provide a quiet and extremely comfortable walking surface. Shoulders of the raised studs are tapered so that loose dirt and liquids on the surface drain off into the recessed areas, thereby reducing the hazards of slipping. Because the color extends through the entire thickness of the tile, Square<sup>2</sup> is designed to retain its good looks for years. Matching stair treads and accessories are available in each Square<sup>2</sup> color selection.

### **ASSURANCE PLUS™ RUBBER TILE**

Flexco's Assurance Plus™ has a subtle pebbly surface texture which complements its slip resistant properties and durability. This maximum performance tile is perfect for shopping centers, terminals, hospitals and other high traffic areas.

Even more, Flexco offers Assurance Detectable Warning Tiles to be used in conjunction with its safety stair treads. Designed with a set of pre-grooved strips which alerts the visually impaired to approaching stairways, this tile meets the original guidelines of ANSI 4.27.2 (American National Standards Institute) for detectable warnings on walking surfaces and comes in all the designer shades of Assurance Plus™. Matching duotone stair treads are also available in a variety of color combinations.

### **FLEX-TUFT™ RUBBER TILE AND MATS**

Formulated from recycled tires, Flex-Tuft™ is durable, non-slip flooring made for the most demanding indoor and outdoor applications. Perfect for damp or wet areas, ramps, foyers, concourses and the like, Flex-Tuft™ endures even the heaviest abuse. Maintenance is limited to regular vacuuming and occasional spot cleaning, and outdoor installations can simply be hosed off and left to dry. Flexco's Five Year Limited Warranty is offered on Flex-Tuft™ rubber tile. Convenient mats are also available in two patterns and a variety of sizes to fit any application need.

## **SMOOTH RUBBER TILE & SHEET RUBBER FLOORING**

Natural resilience, exceptional wear resistance and dimensional stability make this flooring ideal for most commercial installations. Dense, homogenous construction makes it extremely resistant to soil and reduces maintenance to a minimum. Seams stay tight because rubber won't shrink, enabling wheeled equipment to roll freely and quietly. Smooth Rubber Tile and Sheet Rubber Flooring are available in fourteen, beautifully marbled colors.

## **WALLFLOWERS MOLDED RUBBER COVE BASE**

Wallflowers puts the fun back into designing with cove base. In a variety of 32 colors and popular matte finish, it does more than just conceal wall irregularities. Applied in a contrasting color to the wallcovering or floor material, Wallflowers adds a new level of pizzazz and craftsmanship to an interior. Plus, the high-grade vulcanized rubber compound provides superior flexibility for labor-saving installation, and dimensional stability, precise gauging, uniform height, and clean surfaces make it stand out in its class.

## **RUBBER STAIR TREADS**

Made of a high-grade rubber compound, Flexco stair treads are compression-molded to a dense, homogenous construction. The color line is updated continually, and at present includes thirty-five colorations for virtually any installation. Flexco textured treads have any of five raised designs on the first 5" for traction, with the remainder smooth for easy maintenance. For extra traction, use treads with specially implanted carborundum strips.

## **RISERS, STRINGERS AND LANDING TILES**

Flexco rubber stair treads, risers, stringers and landing tiles are made in coordinating colors and can be installed with matching floor tiles (including Smooth Rubber Tile, Radial<sup>®</sup>, Radial<sup>®</sup> II, Square<sup>2</sup> and Assurance Plus<sup>™</sup>). See product sections for color selection. Any of Flexco's rubber tiles may be used as landing tiles. In addition, Diamond pattern landing tiles are available in marbled colors to match the stair treads.

## **RUBBER STAIR TREADS AND LANDING TILES FOR THE VISUALLY IMPAIRED**

### **Assurance Detectable Warning Tile (ADWT)**

This attractive, functional tile is made to meet the needs of the visually impaired by alerting them to an approaching stairway. Designed with deeply-set, pre-grooved strips, a stairway junction can be "felt" through a cane or walking device. This tile meets the original guidelines of ANSI 4.27.2 (American National Standards Institute) for detectable warnings on walking surfaces, and comes in all the designer shades of Assurance Plus<sup>™</sup>.

### **Rubber Stair Treads For The Visually Impaired**

These special treads meet California state standard code Title 24, Section 2-3306-(R) for the visually impaired. Contrasting carborundum stripping available in black, brown, white and yellow, in types 150, 250, 475, 575 and 775. Yellow stripping meets OSHA standards. These treads are also available in continuous lengths up to 9 ft.

## **CONTRACT SOLID VINYL TILE**

Combining the durability of homogenous vinyl with handsome styling, Contract Vinyl is the ideal choice for heavy traffic areas that need to be attractive as well as functional. Because of the tough, non-porous construction, maintenance is reduced to a minimum. Eight colorations in chip or marble patterns are well balanced to contemporary commercial interiors. Special formulation for heat-welded installation is also available.

### **APPEAL VINYL TILE**

Appeal puts beauty underfoot. Plus, its pure vinyl durability is ideal for any high traffic area. Appeal's attractive hues and traditional pattern permit versatility for creating an array of floor designs. Appeal installs quickly and economically, especially when compared to directionally-patterned floor coverings. The fact that it requires low maintenance is an important feature of Appeal's resilient non-porous construction. Durable, colorful, versatile, that's Appeal.

### **GRANITE DIMENSIONS VINYL TILE**

Granite Dimensions, Flexco's vinyl tile with the look of lustrous granite, offers a whole new world of possibilities. The intricate flecked design of Granite Dimensions captures the texture and shade variations of natural stone. Available in beveled or straight edges, its palette of five distinctive colors enhances the effect of elegant polished granite. For dramatic custom floor designs, Granite Dimensions may be used with a variety of solid color or granite feature strips. Granite Dimensions. The perfect choice for lobbies, office buildings, banks, healthcare facilities, high-end residential environments, or wherever both function and high design are essential.

### **VINYL COVE BASE**

Made of homogenous vinyl in a complete range of contemporary colors, Flexco's Vinyl Cove Base has a superior finish to assure an attractive juncture of floors and walls. Its flexibility not only makes installation fast and economical, but it helps conceal floor and wall irregularities. Special heat weld formulation for vinyl cove base available on request.

### **VINYL STAIR TREADS AND ACCESSORIES**

Made of tough, long-wearing solid vinyl with a specially designed safety-rib surface and a high resin content, this tread makes a very resilient stair covering. It's easy to clean and highly resistant to soil and stains. Made in Commercial Weight for heavy traffic conditions, and Standard Weight for light commercial and residential applications. Available in both round and square noses.

### **CONDUCTIVE SOLID VINYL TILE**

Flexco Conductive Solid Vinyl Tile is of a homogenous construction which effectively dissipates static electricity by transferring it from personnel, through the tile, to ground. This is extremely important in environments where static electricity poses danger to sensitive electronic devices. As well, conductive tile is required in areas using flammable gases or explosives. Flexco's Conductive Solid Vinyl Tile is guaranteed for five years to meet the requirements of the National Board of Underwriters, National Fire Protection Association, and applicable government specifications.

### **STATIC DISSIPATIVE VINYL TILE**

Flexco Static Dissipative tile is intended to be used where static control is required, and the resistance level of the floor must be higher than a conductive floor will allow. This quality should be considered if higher voltages are used in the working environment. The surface to ground resistance of this solid vinyl, homogeneously constructed tile ranges between  $1.0 \times 10^6$  and  $1.0 \times 10^8$ .

## **INSTALLATION SYSTEMS**

### **Unitized Tile Installation System**

Flexco Contract, Appeal, Achievement™, Conductive and Static Dissipative Tile may all be heat welded into a seamless, one-piece floor using Flexco Unitized Installation. Floors installed by this unique method are fused together by application of a special welding bead to the floor tile, in either harmonizing or contrasting colors. Made of a special formulation of pure vinyl resins, the 36" x 36" factory pre-grooved tiles are installed in a conventional manner, then vinyl welding beads are fused in the grooves with a portable heat weld gun. The result is a one piece floor without seams. Because of the special vinyl formulation, heat welding of the tiles is fast and permanent.

### **Feature Strips**

Flexco has created feature strips to make innovative designs come to life. They can be applied to enhance existing patterns - or create their own, set off areas from the rest of the room, act as borders, geometrics, checkerboards, stripes ... the list goes on. Feature strips are easy to install and maintain, and come in a rich palette of designer colors to complement any design scheme. They provide that little extra something that makes a good floor, a great floor.
