

FLEXCO VINYL PRODUCTS

Flexco's high quality, dense, non-porous, vinyl flooring offers something for everyone. Over three elegant patterns in a palette of colors for the discriminating designer; superior resiliency and easy maintenance for the concerned building manager; durability and long-wear for the cost-conscious owner; and easy installation and product integrity for the exacting contractor. Created for light, medium and heavy traffic areas, its superior dimensional stability and precise gauging make Flexco's vinyl flooring the right choice for any environment. To complement the variety of styles, coordinating cove base and stair accessories are available. For added pizzazz, feature strips and welding beads can be used to create an array of accent areas, borders and other design expressions such as checkerboard, herringbone, and geometrics. Made to last, Flexco vinyl products inspire unique flooring interiors that stand the test of time.

RECOMMENDED APPLICATIONS

The properties of Flexco's vinyl products make them ideal for reducing noise levels, and keeping scuffs, scratches, and many chemical stains to a minimum. What follows is a representative sample of the locations where you might find a quality Flexco vinyl floor. Contact Flexco for recommendations on the right vinyl floor for your application, 800-633-3151.
