Hallemitte Tuffcoat

A 100% solids epoxy floor coating available in 10 standard colors or custom colors upon request.

Hallemitte HLX

A water-based epoxy system for concrete block walls, water proofing/sealing concrete, coating jersey barriers/abutments, etc. (White or Gray).

Hallemitte Underlayment Epoxy

A 100% solids epoxy base used to restructure, resurface, or to pitch a floor subsequent to application of a floor topping (Economical alternative to high-build system).

Hallemitte Fast Cure Hardener

For use when an accelerated cure time is necessary.

Damp-Proof Primer

Two-component, solvent type system used as an intermediary shield between Hallemitte epoxy flooring components and damp concrete.

Urethane MC 49

A clear, one-component, moisture curing polyurethane coating used for interior applications. It is used to protect concrete floors in warehouses, industrial plants, and laboratories.

Glasto-Flex

A 100% solids flexible epoxy, waterproof membrane used under Hallemite epoxy flooring.

HALLEMITE
