Hubbellite Seamless Flooring Products

ELECTRONIC PRESENTATION

This electronic presentation contains information on Hubbellite 100 and 300 series seamless flooring products, including technical data and specifications. Please contact Hubbellite America, Inc. for additional technical assistance with product selection, application or detailing. A complete technical manual and small samples are available upon request.

PRODUCT PRESENTATION

Hubbellite America, Inc. is engaged in the manufacture and distribution of two unique, superior and economical flooring systems.

Hubbellite 100 Sanigenic:

Hubbellite 100 Sanigenic flooring is widely used in commercial and institutional kitchens. It offers solutions to the most serious flooring problems facing food service operators.

1. SAFETY: Hubbellite ...
 - Is innately slip-resistant wet or dry.
 - Has the capacity to adsorb airborne fat and oil particles without compromising slip-resistance.
 - Has no joints to trip personnel — no tiles to loosen.
2. SANITATION: Hubbellite is ...
 - Bactericidal — Will not support bacterial life; toxic to most microorganisms, including mold and fungus.
 - Repellent to common roach species.
 - Seamless-monolithic — No joints where decomposing food can collect.
 - Odor-reducing — No decomposition odors.
 - Easy to clean — Integral cove base.
3. RESILIENCE: Hubbellite reduces discomfort (to lower back, legs, feet) of those employees working long hours on hard surfaces.
4. LONGEVITY: With minimal maintenance, Hubbellite installations of 15, 20 or even 30 years are not uncommon.
5. AVAILABILITY: Experienced, factory-trained installers are available to apply Hubbellite

throughout the United States.

6. **ECONOMY:** The cost of Hubbellite per square foot per year of service will represent a significant cost savings over other systems. In renovation projects, Hubbellite offers substantial savings in both cost and downtime.

Hubbellite 300 Conductive:

Hubbellite 300 Conductive is used in all areas wherein conductivity, static dissemination and/or resistance to solvents is required.

Hubbellite 300 is ...

- Conductive, static-draining.
- Non-sparking under all service conditions.
- Resistant to attack by all common solvents.
- Able to withstand heavy truck, fork lift and air pallet service.

The Hubbellite formulations incorporate technology originally developed at Carnegie Mellon University and advanced through 50 years in the marketplace. Hubbellite is available across the United States through a network of technical sales representatives and factory-trained installers.

USES, APPLICATIONS

Hubbellite 100 Sanigenic

Kitchens, laundries and locker rooms in restaurants, schools and universities, corrections institutions, hotels, hospitals, nursing homes and industry.

Hubbellite 300 Conductive

Hubbellite 300 is used in explosives manufacturing and storage sites, paint spray booths, coater rooms and in all other areas wherein conductivity and/or resistance to solvents is required.

MATERIALS, FINISHES

Both Hubbellite 100 and 300 are tightly finished to a smooth texture. Hubbellite 100 is available in both grey and red. Hubbellite 300 is available in standard black. Hubbellite 300 is also available in grey and red by special order.
