PP PRODUCT PRESENTATION:

Overview and Description of Product

Tuflex Rubber Flooring is manufactured to the highest quality standards from the finest recycled rubber materials. Tuflex tiles are 27" x 27" 3/8" gauge (686 x 686 x 9.5 mm). Tuflex tiles are manufactured in 21 design patterns. Durability: Exceptional abrasion resistance and load bearing capacity. Safety: Anti-slip surface reduces the risk of slips, falls and accidents. Tuflex has a SCOF of 1.00 which exceeds OSHA and ADA standards for excellent traction. Resiliency: The intrinsic elasticity of Tuflex tiles provide cushioned comfort, sound absorption, and minimalized damage to dropped objects. Tuflex's pigmented surface is vulcanized to the black rubber underlayer. The heat curing of the vulcanization makes each Tuflex tile tough enough to resist pitting and indentation. Sound Absorption: Tuflex is rated with a 0.60 coefficient of sound absorption for an acoustically quiet environment. Chemical resistance: Tuflex tiles resist attack from many oils, acids, solvents, alkalies and other chemicals. Fire and Cigarette Burn Resistant: Tuflex rubber tiles meet Class 1 safety requirements. Maintenance: Tuflex tiles clean easily with regular damp mopping. Tuflex tiles are epoxy-bonded to the sub-floor to form a seamless, sanitary surface, ensuring easy maintenance and the highest quality appearance.

Product Line

Spartus Tuflex - resilient rubber flooring recommended for all applications and multi-purpose use. Available in design numbers: 975 Light Blue with Grey, White, and Black chips; 911 Blue with Beige, Cream, and Black chips; 960 Blue with Dark Blue, White, and Black chips; 913 Grey; 914 Grey with Light Grey chips; 884 Grey with White and Black chips; 973 Grey with Deep Red, White, and Black chips; 840 Off-White with Confetti pebbles; 758 Pecan; 880 Light Pecan with Blue, Black, Beige, and Cream pebbles; 901 Light Pecan with Beige, Cream, and Black chips; 974 Brick Red with White, Black, and Red chips; 753 Deep Red with Red chips; 971 Forest Green with Green, White, and Black chips; 972 Forest Green with White and Black chips.

Titan Tuflex - economically priced resilient rubber flooring recommended for all applications and multi-purpose use. Available in design numbers: 978 Black with Blue and White chips; 977 Black with Grey and White chips; 976 Black with Green and White chips; 970 Black with Deep Red and White chips; 950 Black with Confetti pebbles; 849 Solid Black.

Recommended Applications - Indoor: golf pro shops, dining rooms, club houses, weight rooms, cardiovascular rooms, hockey and ice rink off-ice areas, indoor tracks, locker rooms, day care centers, libraries, bookstores, restrooms, cafeterias, multi-purpose rooms, classrooms, hallways, factories, retirement centers, governmental, military, correctional facilities, hotels, restaurants, retail store sales floors, behind counter areas. Outdoor: pedestrian walkways, warning tracks.

Tuflex Mat - A new product introduced this year is a 4' x 6' (1219 mm x 1829 mm) resilient rubber mat. The 1/2" thick (13 mm) mat is available in five contemporary color patterns. Applications include permanent or semi-permanent installations without the use of adhesives. For areas with ice skate blade, dropped barbells, heavy machinery and high traffic. For areas needing a dynamic and an attractive solution to interior noise-reduction and safety needs.

Feature Strip - customize with Feature Strips made of the same rugged Tuflex construction in various widths for borders and accents. Available in Cardinal Red, Royal Blue, Sand Beige, Chocolate Brown, Pearl Grey, Williamsburg Green and any of the 21 tile designs.

Reducer Strip - TRS-II Reducer Strip reduces the edge of the tile from 3/8" to flush at doorways or in areas where Tuflex adjoins other types of flooring, to give a finished edge.
