

HIGH QUALITY TACTILE SYSTEMS

High Quality...Not Just a Name. It is Our Commitment

You've looked at all the others. Now, it's time to look at the company to which all the others are compared.

As the leader in this industry, we have installed more than one million square feet of Tac-Tile™. That's twice the amount of our nearest competitor.

And, we've thought of everything – safety, design assistance, ease of installation, and technical support. Not to mention a product that blows the competition away in wear and fatigue endurance, chemical and extreme weather resistance, resistance to hard impacts, AND achieving a Class A Fire rating.

For your next project, don't leave anything to chance. Go with the product you know you can count on, go with the company you can trust. Go with High Quality's Tac-Tile™.
