INTRODUCTION:

The FLAMORT Co. has been offering fire retardant coatings for wood and textiles for over 50 years. Our products have been specified domestically, as well as, internationally. All of our coatings have tested to ASTM E84-80 (Steiner Tunnel Test) and/or the NFPA 701 (vertical burn test) standards. For interior wood surfaces clear finishes are available, as well as, a white latex intumescent paint. In most cases, these can be applied in the field with little or no sophisticated equipment.

Also available are our clear fire retardant coatings for fabrics. Typical applications are draperies and curtains, banners, wall coverings, and other decorative items. The Flamort line of fabric fire retardants are easy and safe to apply.

FLAMORT products have used in schools, hospitals, hotels, churches, and institutions where public safety is a priority.
