H & H Specialties has manufactured stage drapery tracks and rigging equipment for entertainment and performing arts facilities for almost 30 years under the Atlas Silk® trademark. Atlas Silk® products are stocked and sold by dealers throughout the United States, Canada, and many other countries, providing local sources for the supply, installation, and maintenance of standard equipment. In addition, the factory's design and manufacturing capabilities are available to create custom modified equipment for special applications.

Over the years, users have come to expect their equipment to accommodate increased loads, with smoother operation, while performing more difficult tasks with greater durability. H & H Specialties has continually worked with architects and consultants in designing products to meet these demands with careful consideration to safety, ease of operation, and longevity.

Complete catalogs of standard drapery tracks and stage rigging are available.
