

## **FIRETROL® , INC.**

For nearly twenty five years, Firetrol® has led the fire pump controller industry with innovative products for better fire protection. A few “firsts” include: part winding, wye-delta, autotransformer and solid state starting fire pump controllers, microelectronic diesel fire pump controller, listed residential fire pump controller, listed high voltage fire pump controller, and listed radiator cooled fire pump diesel engines. The company is committed to engineering excellence and product quality, always searching for creative solutions for the benefit of life safety.

Firetrol’s Industrial Controls Division provides general motor control solutions supplying a broad variety of products. From standard product lines including simplex, duplex and triplex motor controllers, to complex custom engineered VFD systems, the same commitment to engineering and manufacturing shows in every product.

A nationwide network of factory trained Firetrol representatives provides engineering assistance, start-up and field service. Worldwide, the company continues to build internationally with sales and service support representatives in key countries.

Take advantage of Firetrol’s Fast FAX info. It can be your source of up-to-date product information, specification assistance or fire code related questions

**Fast FAX Info. •1-800-FIRETRL (1-800-347-3875)**

**World Wide Web • <http://www.firetrol.com>**

FAX Firetrol for:

- Product Information
  - Sales Literature
