How to register

This is not free software.   You are hereby licensed to use this software for evaluation purposes without charge for a period of 30 days.   If you use this software after the 30 day evaluation period a registration fee of US $10 or 50 FF. is required.

You have two solutions to register ICCD :

1) Use a secure registration with Regnet. Regnet will accept all the major credit cards and has a toll free number.

Phone :   U.S.A. :   1 800 WWW2REG (1 800 999-2734)
           International: (805) 288-1827

Mail :   RegNet - The Registration Network
           21200 Trumpet Drive #201
           Santa Clarita, CA 91321-4441
           U.S.A.

Internet :   http://www.swregnet.com/652p.htm

A $5 fee for shipping and handling will be added for this registration.

2) Use the normal registration by sending me a $10 or 50FF or by INTERNATIONAL money order.
   Payment should be sent to:

Laurent THIRY
" Les Amaryllis "
379, chemin du Serrier supérieur
06320 La Turbie
France

Cash and International money orders accepted only. Checks will NOT be accepted even EuroCheques (they cost too much to process).

When payment is received you will be sent a code that will register your version of ICCD. For any questions, contact the author at his e-mail address:

thiry@inforoute.cgs.fr

Unregistered use of ICCD after the 30-day evaluation period is in violation of U.S. and international copyright laws.

ICCD Registration form

Print the following form and fill it.

Personnal information :

First name : _____

Last name : _____

Address : _____

_____

_____

Zip Code : _____ City : _____

State : _____ Country : _____

Your e-mail adress : _____

ICCD Information :

Version of ICCD : _____

System :   [_] Windows 95   [_] Windows NT   [_] Other :_____

Some tips ...

To run ICCD more efficiently, try these tips :

- Go to http://www.inforoute.cgs.fr/thiry to get some free ICCD Display Themes (IDT).

- Use the right-button menu to quickly access commands.

- To   show or remove the title bar and pull-down menus quickly, just double-click anywhere on the display !

- To move the ICCD window, you don't need to have the pull-menu and the title bar displayed, just left-click anywhere on the display and drag the mouse, the program will follow your movment !

- When you have put ICCD in the tray bar, use the QuickPlay feature to play and pause quickly your CD. Just left click on the icon in the tray bar. If the CD is playing it will pause and if it is paused, it will play.

- It is easy to select a track when ICCD is in the tray bar, just use the right-button menu and select the track option !

The right-button menu

The right-button menu allows you to perform most of the operation with just one click.

You can :

- Play a song or pause the current playing
- Stop the playing
- Move one track up or down
- Select directly any track of the disk
- Put the program in the tray bar
- Quit the program.

Distribution of this program

Provided that you verify that you are distributing the Shareware Version (select "How to register" from the ICCD Help menu to check) you are hereby licensed to make as many copies of the Shareware version of this software and documentation as you wish; give exact copies of the original Shareware version to anyone; and distribute the Shareware version of the software and documentation in its unmodified form via electronic means.   There is no charge for any of the above.

You are specifically prohibited from charging, or requesting donations, for any such copies, however made; and from distributing the software and/or documentation with other products (commercial or otherwise) without prior written permission, with one exception: Disk Vendors approved by the Association of Shareware Professionals are permitted to redistribute ICCD, subject to the conditions in this license, without specific written permission.

Disclaimer of Warranty

Version history of ICCD

- **3.3b** Now you can <u>register</u> ICCD with your credit card. ICCD is a member of the RegNet network. **The registration is now securised and quick**. Just call RegNet and they will give you your personal registration code. This version adds a accelerator key for the tray bar. If you want to put ICCD in the tray bar, just push the " T " key !

- **3.3a**. The bug of " Lost Window " has been fixed. You can now stop playing when you quit ICCD. The " Nag screen " will appear after the 30 days evaluation period. When AutoPlay has been deactivated, you can recognize the CD by pressing the Eject button. You can resize the ICCD Window when the display song option is enabled.

- **3.3**. <u>ICCD Display Themes</u> (IDT) added. You can choose a display theme in the Option Menu, tab Theme. The random routine has been rewritten : a track will play once only. The program module has been rewritten. It is full drag and drop. Now, you can change the order of your program list without clearing all the list. Any track is directly accessible via the right-button menu. The CD door will now close with the eject command. The NT 4.0 Tray Bar bug has been fixed. The display menu bug in Windows NT 4.0 has been removed. New Ergonomy and Quick Access tabs in the Options dialog box.

- **3.2a.** This versions adds ScreenTracking, QuickPlay, Separator characters selection, context help in th option menu, ticks in display menu ... Tooltips are Microsoft compatible. Volume Icon appears under Microsoft Windows NT 4.0 Beta 2. This version also enhances performances of ICCD (ICCD scans no longer the CD-ROM drive all the times to look for the inserted CD)

- **3.2.** This version is Microsoft CD Audio Player compatible. If you have filled the Microsoft's program database, ICCD 3.2 is able to retreive information about a disk without user intervention. The ICCD DataBase will be automatically filled by the program. Tool tips for each button have been added. When the cursor stays over a button for a moment, a tip is displayed explaining the button's function. The bug of a lot of resources being depleted when you wanted to change the display color has been fixed. There's a new registration mode. Now you need to enter your name along with the code. (If you already registered the program, send me regular mail or email with the address you previously gave me and I will send you a new registration code. I need the exact address!) The volume control bar has been added to control the CD Player's volume. The no sound button has been added to turn off the CD Player's sound output. (This can be very useful when your boss comes in!) The bug of the window position not saving when using the x button on the application bar has been fixed. The bug that when you were using the scroll bar, you couldn't use the keys afterwards to control the CD's play has been fixed too. You can now have the right-button menu on a button. The <u>H</u>elp menu in the English version has been fixed with a comprehensive English text. You can put the program in the Windows 95 tray bar to have more desktop space.

- **3.1b.** Ergonomic bugs fixed. The Player can now be always on top. The position of the player is saved when quitting, so when you run it the next time it will be at the same position on your screen. Multi-language Dialog Boxes (English & French) were added. Control buttons are now disabled when there is no audio CD in your CD-ROM drive.

- **3.1a.** This version fixes several bugs, like the <u>grid display</u>. The Grid is now colored like the other displays. The grid now accepts CDs with 25 tracks or more. The awful "No Disk" bug, which was making the program hang, is now fixed.

- **3.1.** With this version you can change the colour of the main display. You can choose a 16 million color palette.You can quit the program with the <u>right-click menu</u>.

- **3.0a**. You can play the music just by pressing the "P" key. Stop the music with the "S" key.

ICCD Display Themes

ICCD Display Theme (IDT) is a new technology that allows you to change your ICCD display. To install a new theme, copy the .IDT file in the WINDOWS\ICCD directory. Go in the theme tab of the option menu and select the theme you want to use. That will change the aspect of the LCD Display, the buttons and the icons. It will not change the other settings.

If you are a programmer, you can easily create and sell your own ICCD Themes. You just need a C compiler and a **registred** version of ICCD. Contact the author for more information.

The ICCD menu

The File menu :
> **Quit**

The Disk menu :
> **Play / Pause** allows you to play or pause the current track
> **Stop** stops the playing
> **Track up** moves one track up
> **Track down** moves one track down
> **Forward** plays 5 seconds forward
> **Rew** plays 5 seconds backwards
> **Eject** opens or closes the CD tray
> **No repeat** plays normally the CD (stops at the end)
> **Repeat disk** repeats all the disk
> **Repeat track** repeats the current track
> **Random play** plays randomly the disk
> **Disk title** assigns a name to the disk
> **Track title** assigns a name to each track of the disk

The Display menu :
> **Menu** displays or not the menu (see the tips for more details)
> **Icons** displays or not the icon bar
> **Display** displays or not the display
> **Volume** displays or not the volume bar and volume icon
> **Grid** displays or not the grid for quick track access
> **Songs** displays or not the songs list box
> **CD title** displays the CD title or the current track title
> **Time information** displays the time information about the CD or the current track
> **Elapsed** if the Time information option is enabled, displays the elapsed time for the current track
> **Remaining** if the Time information option is enabled, displays the remaining time for the current track
> **From start** if the Time information option is enabled, displays the time elapsed from the begining of the CD
> **To end** if the Time information option is enabled, displays the time remaining to the end of the CD
> **Always on top** allows the program to stay visible even if you are working on another window
> **Append in tray bar** puts the program in the tray bar

The Special menu :
> **Program** makes a program list of your songs
> **Options** allows you to configure the program
> **Display color** allows you to change the display color and to choose into a 16 millions color palette

The Help menu :
> **Contents** makes you go to help ...
> **About ICCD** displays information about the author
> **How to register** displays information about registrating the program (if the program is not already registred) (Did you registered it Dude ?)

The display

The display is located in the center of the program and inform you about :

- The main information (title or time information. In this case, the track number is in the left of the display and the time is in the right)

- What is displayed : the title (of the album or of the track) or the time information

- The time information mode (elapsed, remaining, from start, to end) see menu

- The repeat mode (normal, repeat, repeat one, random)

Thanks

Many thanks for debugging ICCD to :

- Gérald BASTELICA, the " Céleste débugger "

- Gilles ORSINI (GNN)

- Christophe ROVILLO (Gonzo)

- and Ted TATMAN for helping me to debug and translate the files from French to English

This button allows you to play or pause the current CD track.

Stops the play of the disc and puts the current track to 1.

This button allows you to eject the CD.

This list box contains the different songs of your CD. If you want to listen to a particular song, just double click on it !

This scrollbar allows you to go in a particular point of the song. When you move the scrollbar cursor, the display will show you the exact time.

With this scroll bar, you can change the CD volume.

This button makes you go to the previous track.

This button makes you go to the next track.

Fast Forward button.

Review button.

This is the quick track access. Just click on the track number. The grid also show you the number of tracks of the CD (if under 25) and the current track.

Turns the volume on and off.
