QuickPop History:

This section describes changes to each version of QuickPop and its date of release.

version   date of release   changes
• 1.0
   (4/10/95)   Initial release of QuickPop
• 1.1   (4/18/95)   Added the ability to launch applications, documents and control panels with the "HotKeys".   Also Added the ability to change monitor settings, change the speaker volume and fixed a bug that would stop a certain key from working if an Apple Menu item was selected but no modifier keys were set.   Can now print list of "HotKeys".
• 1.2   (5/8/95)   Changed the way "HotKeys" are defined which now allows use of ANY key (function keys, etc.).   Can now access and run an FKEY from within an FKEY file from the QuickPop popup menu or by using a "Hotkey".   Fixed a bug that would show up only if not running the Finder and the user would try to open a control panel.
• 2.0   (10/8/95)   Can now use up to 50 "HotKeys".   Users can now set up category folders in the QuickPop Folder for much better organization!   Can now set "HotKeys" to switch between running applications (previous, next or by showing a list to choose from).   Payment can now be made with VISA & MasterCard via email, FAX or standard mail.   Much better documentation and a new registration application to make registering much easier.
• 2.1   (6/21/96)   Fixed problems running the Control Panel on certain computers.   Also changed address.
• 2.11   (7/1/96)   Fixed bug that would cause some applications on 680x0 Macs to crash.
