

Turbo Video Poker v2.0

Windows Game
Copyright 1995-1996 All rights reserved.

This computer game is based on the Video Poker games popular in most casinos. Video poker is played with standard poker rules, but is much faster and more **exciting** than typical poker because you can win many times your original bet. The players goal is to have a hand value of two Jacks or better.

How to Play:

1. The player makes a bet, the shareware version is limited to \$20 maximum bet.
2. 5 cards are dealt face up for the player.
3. Player must now decide which of the 5 cards to discard or hold, in this computer game you hold a card by mouse clicking on the box underneath the card or on the card itself.
4. The player wins with a poker hand of two Jacks or better. For high hands like two pair or better he receives a *bonus* payment which is a multiple of the amount bet. The higher the hand the more you receive.
5. Additional options allow you to set the payout multiplier and sound associated with hands. Any sound .WAV file may be used, windows comes with a few and thousands of them exist and can be downloaded. This will help keep the game fun.

Default Bonus Payouts :

Two Pair	2X
Three of a Kind	3X
Straight	4X
Flush	5X
Full House	8X
Four of a Kind	12X
Straight Flush	50X
Royal Flush	100X

For the shareware version betting is limited to \$20 Maximum and the game will end if your total goes over \$300 or less than 10 after playing at least 20 hands. This allows you to fully test the game without crippling any features or excessive nagging. Once you have paid for the game, you get a new disk or a code to promote you up to a registered version.

The registered version removes the limits, saves your settings, and allows you to change your total. You can also save \$5 by skipping the disk, and receiving a registration code which will turn the game into a full registered version.

This program is provided at no charge for evaluation purposes only. While the game has been

extensively tested and computer games are generally safe and harmless the author is not responsible for any damage caused by the program through direct or indirect use.
