256 Colors for Windows

UFO requires 256 color VGA. To run Windows with 256 colors your graphics card must have a minimum 512k of memory.

To setup Windows for 256 colors follow these steps:

- 1.** Find the disk that contains the video drivers for your graphics card. (If you don't have a disk with video drivers for you graphics card, identify the make and model of your graphics card, and contact the manufacturer to get the proper video drivers for use with Windows.)
- 2.** From either Dos or Windows run Windows Setup.
- 3.** Choose display and select OTHER from the bottom of the list.
- 4.** When prompted for the disk containing your video drivers, place the disk in the drive and press enter.
- 5.** Once the driver is installed, you will need to restart Windows for the change to take effect.

Encounter Types

These are the different Encounter Types seen on the Event Description Window

Type 1 = Sighting

Type 2 = Sighting + Environmental Impact

Type 3 = Contact with occupants

Type 3f = Psychic Phenomena

Type 3g = Abduction

Type 4 = Death or Injury

Type 5 = Cattle Mutilation
