## *RSA Authentication Agent 5.3.4 for PAM*

*August 26, 2005*

---

### **Introduction**

This document lists what's new and changed, as well as late-breaking information, in RSA Authentication Agent 5.3.4 for PAM. Read this document before installing the software. This document contains the following sections:

- [Platform Support](#)
- [What's New in This Release](#)
- [Known Issues](#)
- [Technical Notes](#)
- [Getting Support and Service](#)

This *Readme* may be updated. The most current version can be found on RSA SecurCare Online <https://knowledge.rsasecurity.com>.

---

### **Platform Support**

The PAM Agent is supported on the following platforms:

- Solaris 8, 9, and 10
- Red Hat Enterprise Linux AS/ES 3.0
- SUSE LINUX Enterprise Server 9
- AIX 5L v5.3 with ML2
- HP-UX 11i v2

The Pam Agent supports OpenSSH 4.1p1 for all platforms.

## What's New in This Release

This section describes the major changes introduced in this release. For detailed information on each change, refer to the *Installation and Configuration Guide*.

**Support for UNIX Groups.** You can configure the PAM Agent to always prompt specific groups to authenticate to a protected resource, or you can specify groups that the PAM Agent never prompts to authenticate.

**Support for a graphical login interface.** The following table shows which graphical login tools are supported on the different platforms.

Platform	Graphical Login Tools
<b>Solaris and HP-UX 11i Only</b>	dtlogin (limited to single transaction on HP-UX 11i)
<b>Red Hat Enterprise Linux Only</b>	gdm with the following desktop themes: <ul style="list-style-type: none"><li>• Circles</li><li>• Happy GNOME</li><li>• Blue Curve</li></ul>
<b>SUSE LINUX Enterprise Only</b>	<ul style="list-style-type: none"><li>• xdm (limited to single transaction)</li><li>• kdm (limited to single transaction)</li><li>• gdm with the following desktop themes:<ul style="list-style-type: none"><li>– Circles</li><li>– Happy GNOME, with or without browser</li><li>– SUSE</li></ul></li></ul>

---

## Known Issues

**Tracking Number:** 19639

**Problem:** When exiting an **scp** or **sftp** session that the PAM Agent protects, the session hangs.

**Workaround:** Contact RSA Security Customer Support for the hot fix.

---

## Technical Notes

**To obtain the version number of the PAM Agent:**

1. Change to the **/opt/pam/lib** directory.
2. On Linux, Solaris, and AIX platforms, type:  

```
strings pam_secured.so | grep "Agent"
```

On HP-UX, type

```
strings pam_secured.1 | grep "Agent"
```
