These are fully functional demo versions of the MicroApps Manager and the Rocks MicroApp. All features are the same as in the retail product, but preference changes made in the MicroApps Manager will not be saved. Also, the Rocks "Hall of Fame" scoreboard is disabled.

To use this demo:

- 1) Copy these files to a directory; all the files must reside in the same directory. (**Note:** if you already have hDC FirstApps, avoiding copying over your existing files with these DEMO files).
- 2) From within FileManager, double click on MICROMAN.EXE. (You may also wish to add this file into your Windows Express folder or Program Manager Program Group).
- 3) The MicroApps Manager menu will appear in the upper left hand corner of your active window (this is an "hDC" logo). Click on the "hDC" Microman menu and select **Rocks**.
- 4) Choose "help" within Rocks for information on playing the game.
- 5) **happy holidays from hDC!**

hDC product information

hDC FirstApps is a set of nine MicroApps for Microsoft Windows that let you do everything from viewing your system memory graphically to turning your desktop background into a fully interactive calendar. FirstApps includes these MicroApps: Memory Viewer, Art Gallery, Desktop, Work Sets, Auto Save, Character Set, System Enhancer, Alarm Clock, and Font Viewer.

hDC Windows Express is the most complete corporate menuing system available for Windows. Corporations can develop standard workstations and enhance system security, while providing users with intuitive, easy-to-use folders of applications and documents.

hDC Icon Designer is a MicroApp that lets you create or modify icons for Windows Program Manager. Store and manage your icons in a graphical library that makes it easy to find the icon you want. Icon Designer includes more than 125 professionally designed full-color icons in three icon libraries.

hDC FileApps is a set of five MicroApps that let you take care of essential file operations from within any Windows program. Now you can undelete files, view your disk usage, search for files, encrypt files, share files, and transfer files--all without leaving your Windows program. FileApps will be available in January 1991.
