Copying Printer Files Alters The Name

By One Character

If a user wishes to copy a printer name (.PRS) in Select Printer, the name of the file will automatically be altered. For example, if they choose to copy HPLASEII.PRS, the name of the copied file will be HPLASEI0.PRS (or HPLASEI1.PRS, HPLASEI2.PRS, etc.). The number used is dependent on how many times it has been copied.

Memo ID: WW51\_411K
