Thank you for taking the time to evaluate Time and Billing for Windows.

Time and Billing for Windows requires a copy of the VBRUN200.DLL. VBRUN200.DLL can be found on most popular PC access bulletin boards usually under the name VBRUN.ZIP.

To Install Time and Billing for Windows run Run the Setup Program and answer the questions. If you are upgrading your version of Time and Billing, make sure you ionstall the application inot the same directory that you ran your earlier versions from, then run the Convert program.

After starting Time and Billing for Windows for the first time you will be asked to complete a Company Information Screen, this step is important as this information is used when you print invoices.

Next you should run Client Setup, Task Setup and TimeKeeper Setup to configure your system.

If you have problems or questions or find any "bugs" please contact us at:
