

What is Twisted Pine™ Trailblazer™?

Move it, merge it, find it, recycle it, copy it, erase it, note it, shred it, launch it . . . quickly and easily with Trailblazer. It integrates both file and program manager into a seamless desktop. Combining a uniquely elegant look with uncluttered drag-and-drop, point-and-click simplicity.

Directories can be viewed three different ways allowing you to choose the one that best fits your needs.

Trailblazer's animating icons clearly indicate when to drop during operations such as copy, shred, move, recycle or merge.

Attach notes to files, so later you can search and view those notes, easily finding files of interest.

Trailblazer makes the mundane task of file and program management easier, faster and more enjoyable.

Saving you time and effort for expanding the limits of your world.

Scouting Out a Better Way

Everyone at Twisted Pine believes that you should get more satisfaction from the software you use. We are constantly looking for a better way to give you just that.

Being Windows™ software users ourselves, we were frustrated by the complexity and visual sameness all Windows utilities currently exhibit. We searched for something better. Finally we realized that if we wanted something better we were going to have to develop it ourselves. Therefore, we set out to create software products which are easier and more enjoyable to use. Trailblazer is the first result.

We believe Trailblazer breaks new ground in the domain of Windows utility software, combining powerful features with visual appeal and simple point-and-click, drag-and-drop user interface.

In today's software world the management of files is a necessary drudgery. With Trailblazer we have endeavored to make these mundane tasks easier and far more enjoyable.

In addition, we know you don't want to be burdened with classic new software problems. We undertook an extended testing program to ensure that we were offering you a dependable, solid product. We intend to give you just cause for having confidence in us and the software we engineer.

We personally use Trailblazer everyday. It's the product we want to use, and we believe you will, too. Our sincerest goal is to enhance your satisfaction through our software products.

Install Instructions

This demonstration of Trailblazer will install itself *Only* on your C: hard disk drive. It requires 1.5 megabytes of free disk space. Lastly, the installation assumes that Pkunzip.exe is on your path. If this is not the case you can copy it to the same directory which you are running Install.bat from, then afterwards, erase it.

To run Trailblazer do the following:

- Step 1* Run *Install.bat* from a DOS prompt. This will work from within Windows or just straight from DOS.
- Step 2* From Program Manager enter the dialog box for File Run... Then, type in **C:\Tralbzzr\Tralblzr.exe**. Hit Enter.
- Step 3* Use the *Tutorial.wri* file as a quick walk-thru of some of Trailblazer's features.
- Step 4* Have some fun exploring Trailblazer!
- Step 5* See Orderit.txt for ordering information.

For Your Information

This demonstration copy of Trailblazer is not feature complete. Many of the features in Trailblazer are scaled back or not included. The demonstration copy only supports drives A, B and C and a maximum of 50 files per directory.

All of us at Twisted Pine thank you for taking the time to look at this demonstration of Trailblazer!
