

MASTER AMORTIZER
for WINDOWS™
Version 2.5

The Multi-faceted Amortizing Program

Copyright © 1992, Don Norman
All Rights Reserved.

Master Amortizer is a powerful amortization program with a number of useful functions. In addition to calculating payments, it can create a comparative table of payments and, of course, a variable amortization schedule with any start date and any year end. In its present form, **Master Amortizer** is a shareware product. For use beyond 30 days or you want the latest update, please register as described on the last page of this documentation. A registered copy has no nag box.

LICENSE AGREEMENT

Your use of this package indicates your acceptance of the following terms and conditions:

1. Copyright: These programs and the related documentation are copyright. The sole owner is Don Norman. You may not use, copy, modify, or transfer the programs, documentation, or any copy except as expressly provided in this agreement.

2. License: A limited license is granted to copy and distribute Master Amortizer only for the trial use of others, subject to the following:

- Master Amortizer must be copied in unmodified form, complete with all the files that accompanied it.
- Master Amortizer may not be distributed in conjunction with any other product with out a specific license to do so from Audit Planning Services.
- No fee, charge, or other compensation may be requested or accepted, except as authorized below:

Operators of electronic bulletin board systems (sysops) may make Master Amortizer available for downloading only as long as the above conditions are met. An overall or time-dependent charge for the use of the bulletin board system is permitted as long as there is not a specific charge for the download of Master Amortizer.

Vendors of user-supported or shareware software may distribute Master Amortizer, subject to the above conditions, without specific permission. Vendors may charge a disk duplication and handling fee, which, when pro-rated to the Master Amortizer product, may not exceed three dollars.

Non-profit user groups may distribute Master Amortizer, subject to the above conditions, without specific permission. Non-profit user groups may charge a disk duplication fee, which, when pro-rated to the Master Amortizer product, may not exceed three dollars.

You have the non-exclusive right to use any enclosed program for a period of thirty(30) days for the purpose of evaluating its usefulness to you. At the end of that time you must register the program and pay the current license fee. You may not decompile, disassemble, reverse engineer, modify, or translate the program or the documentation. You may not attempt to unlock or bypass any copy protection utilized with the program. All other rights and uses not specifically granted in this license are reserved by Don Norman and/or Audit Planning Services.

3. Terms: This license is effective until terminated. You may terminate it by destroying the program, the documentation and copies thereof. This license will also terminate if you fail to comply with any terms or conditions of this agreement. You agree upon such termination to destroy all copies of the program and of

the documentation.

The shareware concept

Shareware is copyrighted software which is distributed by authors through bulletin boards, on-line services, disk vendors, and copies passed among friends. It is commercial software which you are allowed to try before you pay for it. This makes shareware the ultimate in money back guarantees.

With Shareware you get to try it for a reasonable limited time (like 30 days), without spending a penny. You are able to use the software on your own system(s), in your own special work environment, with no sales people looking over your shoulder. If you decide not to continue using it, you throw it away and forget all about it. No paperwork, phone calls, or correspondence to waste your valuable time. If you do continue using it, then - and only then - do you pay for it.

Shareware is a distribution method, **not** a type of software. Shareware is produced by accomplished programmers, just like retail software. There is good and bad shareware, just as there is good and bad retail software. The primary difference between shareware and retail software is that with shareware you know if it's good or bad **before** you pay for it.

The shareware system and the continued availability of quality shareware products depend on your willingness to register and pay for the shareware you use. It's the registration fees you pay which allow us to support and continue to develop our products. Please show your support for shareware by registering those programs you actually use and by passing them on to others. Shareware is kept alive by **your** support!

INSTALLATION>

Copy *AMORTWS.EXE* and *AMORTW.HLP* into the directory you intend to use. *AMORTW.INI* saves certain variable data so you won't have to reload it. It is preloaded with defaults. It should be copied to the Windows™ directory. *SPIN.DLL*, *BWCC.DLL* and *WORKLIB2.DLL* should be copied to either the Windows™ directory or the Windows™ system directory.

HELP FILES>

AMORTW.HLP was created using WinHelp 3.10, the current release of WinHelp. WinHelp 3.0 that came with Windows 3.0™ will not read the file, but WinHelp 3.1 will. The distribution disk that is sent with your registration contains WinHelp 3.10 and will read previous version files.

OPERATION>

AMORTW.EXE allows you to create amortization and payment comparison windows (MDI). You can change all the data elements

that affect the calculations as well as options that affect the appearance of the amortization. The Windows™ Help file includes context sensitive help, so you should have no problem following the flow.

ENHANCEMENTS>

Enhancements since the original release include:
spreadsheet file export, PC Status, additional help, odd-month loans, a command bar, multiple printer selection and support, remaining balance and extra payment calculations, and multiple payment frequencies.

Future enhancements will include :

- Any suggested enhancements that merit consideration

REGISTRATION/COMMENTS>

I can be contacted on CompuServe at 72617,2620 for comments or suggestions.
