

TROUBLE & ATTITUDE

This magazine will work on any compatible PC using Windows 3.1 or better. Yes, it will even work on Windows 95. Plus, if you, a friend, or a co-worker has a Macintosh it will work on that too. (Show them the stripper interview) Be sure to have all of your Windows software, video card software drivers, sound card drivers, bus drivers, and cab drivers all up to date. In other words, make sure you are not using a brand spanking new, top of the line, most expensive model computer you can find, with the original version of "Pong" installed as part of the operating system.

Recommended Setup for Windows

- 1) Install Quicktime.**
(Running your "Setup" procedure will automatically install Quicktime)
- 2) Turn off your Virtual Memory**
- 3) Set your monitor for standard 640x480 256 Colors**
- 4) Disable "Ram Doubler" or any other memory enhancing software.**
- 5) Be sure that your computer is equipped with at least *SIX MEGABYTES* of *FREE* ram.**
(This means that you should have eight or more megabytes of memory installed on your computer.)

Video Cards & Sound Cards for TROUBLE & ATTITUDE

The following video and sound cards have been tested and recommended by *Macromedia* with the following text provided by *Macromedia*.

VIDEO CARDS

Director requires video software drivers and hardware that fully support Windows 3.1 standards. The following video systems have been tested and found to be compatible with Director during authoring and playback. We recommend installing the latest available video ROM and software. Contact the video card manufacturer for information.

Authoring and playback are not limited to these systems. If you experience difficulties with a card that is not on this list, first test it at 640 x 480 resolution with the monitor's color depth set to 8 bit (256 colors). Next, contact the hardware manufacturer to find out if the problem has been addressed with an updated driver.

The following cards have been tested and provide acceptable results for authoring and playback:

Video card	Bus Type	Driver Date	Rev	Notes
ATI Graphics Wonder	VLB	3/19/93	2.3	
ATI Graphics Xpression	VLB	6/13/94	1.1	Note 1

TrueVision Bravado 8	ISA	1/15/92		

Note 1: Driver version 1.53 sometimes freezes when playing certain Director transitions. Driver version 1.42 is recommended.

Note 2: Does not always properly display QuickTime digital video in 16-bit (thousands) and 24-bit (millions).

Note 3: Does not draw extremely wide arcs properly.

Note 4: Sound break-up or distortion may occur during complex transitions.

Note 5: The cursor sometimes disappears when using a large virtual desktop.

Note 6: Video snow appears during some palette transitions.

SOUND CARDS

The following sound cards have been tested and are compatible with Director:

Sound Card	Notes and comments
Compaq Business Audio	
Creative Labs SoundBlaster	

Creative Labs SoundBlaster Pro
Creative Labs SoundBlaster 16
Creative Labs SoundBlaster AWE32
Gateway 2000
IBM M-Audio *
MediaVision ProAudio Spectrum
MediaVision ProAudio Spectrum 16
MediaVision ProAudio Spectrum 16 Pro
Microsoft Windows SoundSystem Version 1
Microsoft Windows SoundSystem Version 2
Orchid SoundWave 32
Reveal Forte 16
Roland Rap-10

* IBM computers that have the M-Audio sound card should use driver version 1.3 or higher for best results. Older versions of this driver don't play all sounds in Director or AVI movies. The version 1.3 driver did not pass the 16-bit sounds test for Director. Testing revealed that 8-bit sounds are corrupted when played after a 16-bit sound. At the time these release notes were written, version 1.3 (dated 1/10/94) was the most recent driver available from IBM.

PIPELINE

If you are having TROUBLE installing Pipeline from the Pipeline screen it is most likely because your computer is low on RAM. Therefore, you must install Pipeline in either of 2 ways:

1) Open up the Trouble & Attitude CD-ROM in file manager (Don't run the program, we are only opening up some folders). Then open up the DATA folder, then the ADS folder, then the PIPELINE folder, then the WINUSA or WINNY folder, then run SETUP.EXE in that folder.

2) Install Pipeline by choosing the FILE menu in PROGRAM MANAGER, then choose RUN. This will give you a dialog box to type into.

"E" would be replaced by the actual letter of your CD-ROM drive.
Type "E:\DATA\ADS\PIPELINE\WINUSA\SETUP" for Pipeline USA
Type "E:\DATA\ADS\PIPELINE\WINNY\SETUP" for Pipeline New York
Then run it.

VIDEO PROBLEMS?

If you press on a VIDEO button and nothing happens, or the screen changes for a split second, then QuickTime is not installed on your computer.

To install QuickTime from the CD-ROM onto your computer:

"E" would be replaced by the actual letter of your CD-ROM drive.
Type "E:\QTMQTINSATL.EXE"
Then run it.
