### 1.2 Introduction...

Introduction

~~~~~

This package contains 11 new High-Quality Magic-Backgrounds for use with Martin Huttenloher's MagicWB. I created 53 backgrounds before - this is the sixth release.

This time I converted 6 very nice photos to a 16 color palette - the first 8 colors are MagicWB, the last 8 colors were defined by Roman Patzner (RomIcons). All pictures are 800x600 in size - you may crop them to perfectly fit on your screen (and to save RAM).

---

These big pictures are in PNG format, because they are half as big as equivalent IFF pictures (and even smaller than GIF ;-).

After all I added 5 standard eight-color textures which can be repeated without any visible borders.

## 1.3 COPYRIGHT...

### COPYRIGHT

~~~~~

This package is MAIL-WARE! It can be freely distributed and copied, as long as the following conditions are fulfilled:

- \* The sales price must not be higher than the cost of an (empty) disk plus a nominal copying fee plus costs for shipping. The total price must not be higher than 5 US\$ or 7 DM or the equivalent in any other currency (on CD-ROM: 25US\$ or 35DM).
- \* All parts of the archive and the documentation must be complete. The distribution of single parts or incomplete subsets of the original distribution is not allowed.
- \* These backgrounds or parts of it may not be sold in combination with or as part of commercial software. However, I may allow exceptions to that restriction in individual cases. If you want to spread this package as a supplement to a commercial program, please contact me. Until you receive a written permission from me, do not assume you may distribute Magic-Backgrounds with or as part of your commercial program.
- \* The pictures and documentation may not be changed in any way. Exception (this means: acceptable) is the use of archivers such as 'LHA' and 'LZX', as long as it remains possible to retrieve the original data.

Magic-Backgrounds-6 is MAIL-WARE, this means I request those users, who regularly use my backdrops to  
send me  
a postcard or e-mail!

BTW: There is NO WARRANTY of any kind and I won't feel responsible if you manage to destroy any hard- or software while using this stuff - use it at your own risk ;-)

## 1.4 Contents...

Contents

~~~~~

---

Here are the 8-color patterns:

```
BricksGrey
Confetti
Pebble
Storm
Stucco
```

And now the 16-color backgrounds:

```
Beach
Clouds
Mountains
Terrace
Thunder
Valley
```

## 1.5 Requirements...

### Requirements

~~~~~

In order to use the small 8-color-backdrops you need:

- \* An AMIGA ;- ) with at least Kick 2.0+ (3.0 recommended)
- \* A properly installed MagicWB of Martin Huttenloher  
or under WB 2.0/2.1 NickPrefs (AminET util/wb/NickPrefs.lha)

To use the BIG 16-color-pictures you need

- \* A PNG-datatype, e.g. from AminET (util/dtype/png\_dt.lha),  
because the pictures are in this format
- \* A program to setup the 16 colors on WB, e.g. MagicWB-Demon  
or LockColors from AminET 'util/cdity/lockcolors1\_1a.lha'
- \* Internet access - so you can send me e-mail with  
comments  
!

## 1.6 Installation...

### Installation

~~~~~

First install a PNG-datatype (see  
requirements  
).

---

Then you have to setup the right colors - therefore you will need a programs which locks them (see requirements).

Set your colors to

```
Color  R   G   B
-----
 0   149 149 149 ---+
 1     0   0   0   |
 2   255 255 255   |
 3    59 103 162   +--- MagicWB colors
 4   123 123 123   |
 5   175 175 175   |
 6   170 144 124   |
 7   255 169 151  ---+
 8     0   0 255  ---+
 9    40  62  91   |
10    96 128  96   |
11   226 209 119   +--- Extended Rom-Colors
12   255 212 203   |
13   122  96  72   |
14   210 210 210   |
15   229  93  93  ---+
```

For example start you MagicWB-Demon like this:

```
Run <>NIL: MagicWB-Demon 4,123,123,123 5,175,175,175 6,170,144,124 7,255,169,151 ←
      8,0,0,255 9,40,62,91 10,96,128,96 11,226,209,119 12,255,212,203 ←
      13,122,96,72 14,210,210,210 15,229,93,93
```

Then drop the pictures into your 'pattern-directory' and choose a background with the 'WBPattern' program!

Have fun!

## 1.7 Author...

Author

~~~~~

You are welcome to send comments, suggestions, Ferraries ;- ) to 'math@sun.rz.tu-clausthal.de' or

```
