PerfectFit File Dialog ALM Functions

[File Open](#)

[Save As](#)

[Select Directory](#)

File Open

Platform	MS Windows
Action	Returns a fully qualified path and file name, but does not open the file.

Input Parameters

Dialog Title	The text to be displayed on the title bar of the dialog. If no text is entered, then "Open" is used. *Type Optional Text*
OK Button Text	The text to be displayed on the "OK" button (the action button). If there is no text specified then "OK" is used. *Type Optional Text*
Default Directory	The initial directory to open the dialog in. An error will occur if the directory does not exist. If no directory is specified, the windows default directory will be used. *Type Optional Text*
File Mask	The file mask to use in displaying the files in the filename list box. *.* is used by default. *Type Optional Text*

Output Parameters

File Name	Contains the full path and filename of the selected file. *Type Required Text*

Flows

Selected	Followed after the user selects a directory by selecting the OK button on the dialog.
Canceled	Followed if the user cancels the dialog in any of the normal windows methods.

Save As

Platform	MS Windows
Action	Returns an existing file name, or a new file name as entered by the user, but does not save the file.

Input Parameters

Dialog Title	The text to be displayed on the title bar of the dialog. If no text is entered, then "Open" is used. *Type Optional Text*
OK Button Text	The text to be displayed on the "OK" button (the action button). If there is no text specified then "OK" is used. *Type Optional Text*
Default Directory	The initial directory to open the dialog in. An error will occur if the directory does not exist. If no directory is specified, the windows default directory will be used. *Type Optional Text*
File Mask	This is the file mask to use in displaying the files in the filename box. *.* is used by default. *Type Optional Text*
File Name	Contains the filename to display in the filename edit control when the dialog is opened. *Type Optional Text*

Output Parameters

File Name	Contains the full path and filename of the selected file. *Type Required Text*

Flows

Selected	Followed after the user selects a file name and directory by selecting the OK button on the dialog.
Canceled	Followed if the user cancels the dialog in any of the normal windows methods.

Select Directory

Platform	MS Windows
Action	Returns an existing directory, or creates a new one as entered, but does not change to that directory.

Input Parameters

Default Directory The initial directory to open the dialog in.   An error will occur if the directory does not exist.   If no directory is specified, the windows default will be used.   *Type Optional Text*

Output Parameters

Returned Directory Contains the full path of a directory selected from the Select Directory dialog.   *Type Required Text*

Flows

Selected Followed after the user selects a directory by selecting the OK button on the dialog.

Canceled Followed if the user cancels the dialog in any of the normal windows methods.
