

NetWare v3.1x SNMP Agent Upgrade Version v2.1  
19SEP94  
Release Notes

TCP188.EXE contains an extensible SNMP Agent is an upgrade to the SNMP Agent that is delivered as part of NetWare v3.11, and is also an upgrade to the SNMP Agent that was delivered with the NetWare v3.11 SNMP Agent Upgrade Version 2.0. The new SNMP Agent is backward compatible.

Refer to the "Novell NetWare TCP/IP Transport Supervisor's Guide" for command-line options and reference material.

Additional configuration can be accomplished through:

SYS:ETC\SNMP.CFG  
SYS:ETC\TRAPTARG.CFG

Use SYS:ETC\SNMP.CFG to configure the following MIB-II parameters:

sysName	System Name
sysLocation	System Location
sysContact	System Administrator/Contact

The format of the file is described in comments within the file.

Use SYS:ETC\TRAPTARG.CFG to configure trap destinations.

Trap destinations are Internet hosts that receive traps generated by this system. Traps can be sent over both TCP/IP and IPX. The format of the file is described in comments within the file.
