## PRINTING

You can print both the stat sheet and the phone book from their pull-down file menus or use Ctrl-P (short cut keys). Keeping a weekly printout of the stat sheet helps you see how players are doing from week to week throughout the season. **IMPORTANT NOTE:** In case of data loss, keeping print-outs will help you recover your data.

## PHONE BOOK

Use the phone book to keep the names and telephone numbers of all your players and coaches. Bring up the phone book from the pull-down menu or use Ctrl-D (D for dial). Enter the names and phone numbers and then save your entries with the save option in the phone book file menu. You can use the same name you used to save your team data file because a different extension ".FON" is used to save the phone book data.

## **SORTING FEATURES**

The Sort pull-down menus will allow you to better analyze your stats by sorting your players in various statistical categories.

## **UPDATE TEAM**

Once you have loaded a previously saved team and wish to update the stat sheet, just move to the box you wish to update and press the "+" key and the number in that box will increment by one with each "+" key pressed. The average and percentage fields automatically update. Repeat this procedure with each player and save your work.

## SAVE TEAM

Bring up the save team screen from the pull-down file menu or use Ctrl-S (short cut keys). Type a name for your saved data, up to 8 characters can be used. We suggest you use your team name when saving team data. If you manage several teams and wish to keep everything organized and easy to find, using team names is the best method. **IMPORTANT NOTE:** As a safeguard we recommended that you print the stat sheets after each update session. This provides you with a hard copy of your work. Saving any stat sheet will automatically save all the stat sheets and the phone book for that team.

## **LOAD TEAM**

LOAD TEAM: Bring up the load team screen from the pull-down file menu or use Ctrl-L (short cut keys). Point to the file you wish to load and double click or press enter. Loading any stat sheet will automatically load all the stat sheets and the phone book for that team.

## **CREATE TEAM**

When starting Basketball Stats for the first time, you will have to create your team. You start by entering the names of your players on the stat sheet. We suggest not using all caps as you will not be able to fit as many characters in the name field. You can use the arrow keys, tab key or the mouse to move through the fields. The enter key jumps down to the next line.

## PROGRAM FILES

The following files are placed In your program \Bball directory

Bball.exe	The Program file
Bball.hlp	Stats help file
Bball.cfg	Configuration file
Bball.off	Sample offensive stats

## **INTRODUCTION**

Basketball Stats by MOJO Software is for keeping track of Youth and School Basketball Team stats. It automatically calculates the averages. Input the new figures after each game and the average and percentage fields will update automatically. It also keeps track of player names and telephone numbers. Allows you to sort and print data, and use statistics to better manage your team. Other Sports software products from MOJO Software include Baseball and Football Stats for Windows with more to follow.
