---> TimeTracker™ is distributed as shareware, so feel free to upload the unregistered version to bulletin boards. <---

Please post TimeTracker to other bulletin boards.
And if you do, please include the following text as the product description.
Thanks for helping!

------------------------- cut here ------------------------

Do you work or charge by the hour?   If so, then you need TimeTracker.
TimeTracker is a simple $25 time-tracking application for recording time tasks on the Macintosh.

TimeTracker is useful for consultants, programmers, attorneys, graphic designers, or anyone who bills for time, or just wants a simple solution for keeping track of time events.

Partial feature list:

• Have multiple time sessions going at the same time
• Windows can be enlarged to fill entire screen or minimized to a very small size
• Build your own Categories & Projects list
• Sort time entries
• Search time entries
• Export & print time entries
• Extensive editing controls in one easy-to-use window
• Marked and unmark time entries
• Set Time and Money budgets
• Start, Stop, Pause, Resume, and Restart time entries
• Record time in increments of 1, 6, 15, 30 minutes, or 100ths of a minute.
• A complete user's manual.
• And much more...

TimeTracker by Maui Software.
