

Director 6.0 Plug-In for Netscape Communicator 4.0
Beta Version d6044

1. Introduction

This file outlines the version, general notes, system requirements, and any known problems.

2. General Information

SYSTEM REQUIREMENTS:

Hardware:

- IBM compatible PC
- Intel 80486, 25 mHz or greater

or

- Macintosh 68K or PPC

and

- 8-bit (256) colors or greater
- 8 MB free disk space
- 14-20 MB available MB RAM
- FPU for Audio streaming playback

Software:

- Microsoft Windows 95, Microsoft Windows NT 3.5.1/4.0, Windows 3.1 or Windows for Workgroups 3.1.1
- Netscape Navigator 4.x

3. Bug Reporting

To report bugs to Macromedia, go to <http://www.macromedia.com/shockwave/bugs> and fill out the available form. When reporting bugs, please use the build number d6044.

Users can help us by including Dr. Watson or Macsbug stack traces in bug reports.

It is important that test sites use the latest version of Macsbug (6.5.3). It is available from the following anonymous ftp sites:

<ftp://ftp.info.apple.com/Apple.Support.Area/Apple_SW_Updates/US/Macintosh/Utilities/MacsBug_6.5.3.sea.hqx>

<ftp://ftp2.info.apple.com/Apple.Support.Area/Apple_SW_Updates/US/Macintosh/Utilities/MacsBug_6.5.3.sea.hqx>

<ftp://ftp3.info.apple.com/Apple.Support.Area/Apple_SW_Updates/US/Macintosh/Utilities/MacsBug_6.5.3.sea.hqx>

A detailed explanation of the steps required to recreate the problem, as well as the stack trace information, will help us to determine and correct the problem.

4. Known Issues

Macintosh:

For optimum performance when using this Beta version, it is recommended that you increase Netscape's preferred memory partition size to 18 MB. To do this, follow these steps:

- Quit Netscape Navigator.
- While in the Finder, select your Netscape Navigator icon.
- Choose "Get Info" from the File menu.
- Set Netscape's Preferred Size to 18,000k or more, provided you have sufficient RAM installed on your machine.
- Close the "Info" window and relaunch Netscape.
- When Netscape has reloaded, select "Network Preferences" from the Options menu. Set the cache size setting to at least 5 megabytes.
