

sLog™ 2.0

Copyright © 1996 - 98 Catara™ Software, All Rights Reserved.
This application is \$15 shareware.

Version History

Version 2.0

- First official release of sLog 2.0
- Improved the speed of table operations
- "Consolidate Records" now removes duplicates

Version 2.0fc1

- Fixed a sorting problem where a crash record would be listed first.
- Fixed a bug where notes could be saved multiple times unintentionally.
- Fixed a bug where the description part of the note would not be saved.
- Fixed a small bug with the statistics routines
- sLog 2.0 now allows you to work with multiple sLog files.
- Better error handling and more error messages.
- Changed the behavior of the About Box and Statistics dialog
- sLog 2.0 now support Cut/Copy/Paste commands
- More robust file handling
- Moved related files in the Preferences folder to "sLog f" inside the Preferences folder

Version 2.0β1

- complete rewrite and repackaging of SysLog 1.0

Description

sLog 2.0 is a handy system management utility that allows you to keep track of you system's stability by recording the time your computer restarted, or crashed. sLog, intended to be used by both users and administrators alike, has many potential uses including:

- Logging how much a computer is used, for tax or record keeping purposes
- Finding out how stable a particular computer is
- Determining if a new piece of software or hardware is causing subtle problems
- Letting you know if a computer is being improperly shutdown
- Finding out if someone has been using a computer when they weren't supposed to be
- Loads of other things

sLog 2.0 is a complete rewrite of the original SysLog program. As you'd expect from Catara, sLog is robust, 100% PowerPC native, fast, easy to use, and efficient. At \$15, it's a lot cheaper than hiring someone to keep track of when and how long your computer was used.

Requirements

- 680x0 or PPC
- Color Quickdraw
- System 7 or MacOS 8.0
- 2 MB free disk space
- 2 MB of Free Memory

The Installer

I would like to thank MindVision for its support of the shareware community.

The installer for this product was created using Installer VISE Lite from MindVision Software. For more information on Installer VISE Lite,
