Customizing items
to be installed

You may customize the installation of Classroom Publisher to better suit your specific needs.

Select Classroom Publisher to create a folder named "Classroom Publisher" and place the application inside it.

Select Dictionaries places the files "Dictionary" and "User Dictionary" inside the folder named "STAZ" located inside the System Folder. If the folder "STAZ" does not exist it will be created. Both files are necessary for Classroom Publisher to operate.

Select Classroom Publisher Data to place the file named "Classroom Publisher Data" inside the folder named "STAZ" located inside the System Folder. If the folder "STAZ" does not exist it will be created. This file is necessary for Classroom Publisher to operate.

Select Stationery to place a series of previously designed stationery inside the folder named "STAZ" located inside the System Folder. If the folder "STAZ" does not exist it will be created.

Select Tutorials   places several example documents inside the folder named "Tutorials" located inside the folder "Classroom Publisher." If neither of these folders exist they will be created.

Click Standard Items to select all items for installation.

Click OK to return to the installation process.
