

# Get Info v0.7 Release Notes

Copyright 2001 Gideon Softworks, Inc.

## What is Get Info ?

Get Info is a file attribute editing system. It's feature list includes :

- Open Multiple Batch/Info windows at once
- Change UNIX Permissions of a file or folder
- Change the Owner and Group of a file or folder
- Change Macintosh Type and Creator codes associated with a file
- Work on multiple files at the same time using Batch mode
- Get Info supports authenticating as an Administrator to perform all actions
- Type and Creator favorites with built in editor
- Recursive Owner/Group and Permission setting
- Get Info Dockling integrates Get Info seamlessly into the finder

Get Info eliminates the need to use Terminal, and makes changing attributes on multiple files a breeze.
