How do I install new skins?

Note: PocketNotes 1.0 skins are not compatible with PocketDock 1.1+. To fix the problem do the following:

1. Quit PocketNotes.
2. Delete or move the skins located in, <HOME>/Library/PocketNotes/SkinsInstalled.
3. Install the updated skins into <HOME>/Library/PocketNotes/SkinsInstalled. New skins can be downloaded from our web site at: <http://www.pocketsw.com/PocketNotesSkins.html>.

Simple Instructions. Double click on pnskin file.

Complete Instructions. There are three ways to install a new skin. One, open the Preferences menu item under the PocketNotes menu and click on the Skins button. This will open up the Manage Skins inspector. Click add to add skins and delete to delete skins (you cannot delete built in skins). Two, double click on the <name>.pnskin file. Three copy the <name>.pdskin file to <home>/Library/PocketNotes/SkinsInstalled/.
