iVCD

The Easy Way to Author VCDs™

iVCD allows you to easily make Video CDs and Super Video CDs on Mac OS X from iMovie, Quicktime or AVI movie files. iVCD can be used to author Video CDs (MPEG-1) or Super Video CDs (MPEG-2), with or without menus, and supports both NTSC and PAL output formats.

- Authors Video CD (VCD), Super Video CD (SVCD) *, XVCD and XSVCD
- Works with iMovie, Quicktime Movies, MPEG, AVI*
- Converts to MPEG-1, MPEG-2 or generic MPEG
- Supports play lists and menus
- Special features such as Kiosk mode, lighten video, variable MPEG encoding quality
- TV Safe Border effect for rescuing video that appears clipped on the TV screen
- Supports NTSC and PAL
- Easy-to-use "drag & drop" interface and one-step "convert+image+burn" operation
- Keeps a project folder so multiple copies of VCDs can be easily made
  *for MPEG2 and AVI, see system requirements

MacVCD

The Easy Way to Play™

MacVCD is the easy-to-use Video CD, Super VCD and Quicktime movie player that finds, loads and plays the movie for you, automatically chaining the tracks and ejecting the disk when it's done.

- Playback on full screen display, small screen display in floating* or regular window, & second screen (like a TV)
- Automatic VCD format recognition and file chaining
- Auto Play and Auto Eject
- Easy to use standard Macintosh Interface with Movie Controller Bar, Keyboard control and Hands Free™ speech activated controls
- Support for both multi-language and karaoke soundtracks
- Super VCD (MPEG2) playback on both G3s and later (with purchase of Apple's Quicktime MPEG2 component)*
  *available on OS X only

MacMP3CD

The Easy Way to Burn and Play™

MacMP3CD is a Mac OS X MP3 CD player and recorder with burn list creation, easy disk navigation, and ability to organize MP3s into folders, and built-in CDRW erase feature. MacMP3CD's player features auto play and auto eject, looping, song skip, and song select.

- Burns and Plays MP3 CDs
- Supports WMA and MP3 file formats
- Supports Burn Lists to save MP3 CD content list, for easy re-creation
- Supports folders for easier organization and navigation
- Easily navigates all hard disk folders (including multiple users)
- Supports auto recognize, auto play, auto loop, auto eject
- Playback controls including volume, play/pause, restart, repeat, song select, CD eject
- Built-in CD-RW erase feature

NetShred

The iDocument Shredder™

How private is your web browsing? Don't risk having private information stored by your browser read by anyone with access to your computer. Use NetShred to securely delete browser cache, history files and email trash.

- option to shred (not just delete) browser cache, history, email trash, junk mail
- supports several web browsers & email applications
- runs automatically whenever you quit your browser
- the "Confirm before shred" feature
- Compliant with electronic document shredding standards *
- a configurable overwrite pattern and number of overwrites
  *available on Mac OS X only

ShredIt

The eDocument Shredder™

How secure is your trash? Confidential files can be recovered from your computer's trash. Don't risk it - use ShredIt to securely delete files, folders and disk free space.

- the Safe Place™ feature which protects data from accidental shredding*
- an easy-to-use interface ("drag and drop" or "select from menu)
- the option to shred files, folders, disk free space, CDRWs
- the "Confirm before shred" feature
- Can shred items already thrown in the trash
- Compliant with electronic document shredding standards
- a configurable overwrite pattern and number of overwrites
  *available on Mac OS only

ToTheTrash!

The Mac Trash Manager™

Can't decide if its trash? To the Trash! Is an easy-to-use utility that stores files for as long as you specify, allowing you to retrieve them if you need to, automatically deleting them if you don't. Use it to store, age off and then delete all those files you're keeping for awhile, just in case.

- easy-to-use "drag and drop" interface
- stores files or folders for retention period you specify (days, weeks, months, years)
- configurable retention periods
- easy to retrieve files you need before they've expired
- automatically deletes expired items (trash throws itself out!)
- supports multi-disk and multi-user systems
- runs from desktop or from dock
