What is Music Man and why do I need this?

Music Man is the music manager for Mac OS X. Music Man can be used to:

1. create a music library from any folders on your computer
2. create play lists from any music in your library
3. convert play lists to various audio file formats
4. burn WMA¹, MP3², and OGG³ files to CDR and CDRW media
5. write WMA, MP3, and OGG files to flash media
6. reduce the size of MP3 and OGG files written to flash media without changing the original files on your computer
7. convert MP3 and OGG files written to flash media from Stereo to Mono without changing the original files on your computer
8. rip Audio CD tracks to high quality OGG and MP3 formats
9. play Audio CDs, unencrypted-WMA, MP3, OGG and WAV files

MP3, WMA, and OGG music formats allow you to put over 10 hours of CD quality music on a single CD. These digital music CDs are playable on your computer, on portable CD players, and on car CD players.

MP3, WMA and OGG music formats allow you to put as much as 4 hours of music on a 64mb flash media⁵. Flash media is playable on your computer or on portable digital music players.

With Music Man you create play lists, burn them to CDs, copy them to flash media, or convert their music to another format. Using play lists makes it easy to create another copy of a CD if the original is lost⁴.

Music Man allows you to easily create a library that includes music from any the folders on your computer (including across multiple users and hard disks), so that you can easily find and choose files from all the music on your computer.

Music Man's play lists allows you to organize MP3s, WMAs and OGGs into folders, so that you can skip to the next folder with the click of a button (a feature supported by the latest MP3 players) during playback. As well, play lists allows you to decide the order in which the songs are stored, so they playback in the order you want.

Music Man also supports both ID3 v1 & v2 tag formats so that your MP3 CD player displays the correct information. Music Man has a built-in erase feature so you can erase and re-use CD-RWs.

Music Man – the Macintosh Music Manager™

If you intend on playing MP3 CDs on your Macintosh computer and using Music Man as the player, the MP3, un-encrypted WMA and OGG formats are supported. If you intend on playing your MP3 CDs on a component, portable, or car CD player, you need to check the specifications of your CD player to ensure it supports the file formats.

¹ Windows Media Audio, ² MPEG Audio Layer-3, ³ Ogg Vorbis, ⁴ There are no limits on the number of times you can burn a CD, ⁵ 4 hours AM Quality, 2 hours FM Quality, 1 hour CD Quality

Quick Start Instructions

These Quick Start Instructions will have you running Music Man in less than 15 minutes. If you need more detailed information about how to use Music Man or Music Man features, refer to the Read me.

Quick Start Instructions

1. Drag the Music Man folder to the Application folder.
2. Double click the Music Man icon. A dialog appears when you launch the program, displaying four buttons:

Quit	To quit the program, click the "Quit" button
Run Demo	(Downloaded version only). For further information, refer to the Read Me.
Buy Now	(Downloaded version only) To buy this software now online, click the "Buy Now" button and follow the instructions.
Register	To register the program now, follow the instructions below.

3. Register Music Man.

The Registration dialog will appear when you launch the program.

- Enter the License Type, Purchaser's Email ID and Registration Key supplied when you bought the product.

If you purchased online, the easiest way to do this is to copy (Apple C) and paste (Apple V) the information from the email we sent you.

If you purchased using the "Buy Now" button, skip this step.

- Click the "Register" Button

If you have entered the Registration information correctly, the “Registered” message will be displayed.

If there is a problem with the registration information, the “Invalid Registration Information” dialog will appear. To correct the problem, refer to the “Music Man FAQ” in the documentation folder.

4. If required, update the preferences. For further information about the options, refer to the Read Me.
5. Refer to the Read Me for step-by-step instructions for using Music Man.

Description of Contents

This section describes the contents of each file supplied with the software.

File Type	File Name	Description
Application Program	Music Man	The program. This file contains both the demo version and the full version. You can try the demo for free. To enable the full version, you need to purchase a Serial Number.
Documentation	Music Man Quickstart	This file
	Music Man Read Me	Contains more information about Music Man, including installation instructions and the version history
	Music Man FAQ	Contains frequently asked questions about Music Man
	Mireth Order Form	Use this to order by mail
	Mireth Products	Contains information on all of our products
	Buy Me FAQ	Contains frequently asked questions about buying software from Mireth Technology
	EULA	End User License Agreement. Using the software indicates your acceptance of these license terms.
