iStar Composer

Add a New Dimension to your Music or Podcast.

Overview

iStar Composer is an original and major new application that creates synchronized lyrics/text with music/audio on the Mac to export to the iPod and iTunes. iStar Composer finds lyrics, but more importantly allows you to synch them to a song. Composer then allows you to export this new composition to a new music file (AAC) that contains embedded lyrics that play/display in iTunes and on the iPod. By displaying the lyrics iStar Composer adds a new dimension to the iPod and iTunes. People will not just be looking at the song and title in iTunes and their iPod but can now enjoy reading or singing along with them too.

Bring Lyrics Back To Life

Downloadable music is very convenient but it has always been missing one thing that was available in the past and that is LYRICS! In the 60's and 70's records had lyrics on the back of the albums. In the 80's and 90's CD's had lyrics in the inserts. Downloadable music does not have lyrics. This loss is remedied by iStar Composer an original application that doesn't just add lyrics but makes synchronized lyrics available on the Mac, in iTunes and on the iPod.

Technique

iStar Composer has some very original tools and techniques to line up the lyrics with the music. These tools make it easy to quickly add synchronized lyrics for any kind of song you own.

What It Can Be Used For

iStar Composer can be used for editing and displaying lyrics, opera, karaoke, jokeoke (where people imitate a robin williams or another comedy routine), poetryoke (poems done to music), children's stories or children music, translation of text or lyrics, display of text for any audio track. And it is fun almost like playing a video game. Who benefits from iStar Composer? Musicians, podcasters, educators, kids, parents. Everyone because it adds another dimension to audio content of all kinds.

User Created Examples Music, speeches, lectures, stories, in the future there will be examples you can download on our site. Feel free to send us your compositions. **Much more to come** iStar Composer is just beginning. We have many features and surprises on the way and we welcome your contributions.

Installation Just drag iStar Composer to your application folder.

How To Use It Double click iStar Composer to start the application. Go to the help menu to learn more.

How It Works iStar Composer takes a text file and an audio file (from your iTunes collection) copies these to a new folder. Then you use various tools in iStar Composer to synch the text with the audio. After that you can export a new audio file (AAC format) to the iTunes Library where you can play/see it. Then update your iPod so it can also be heard/seen there as well.

Registering iStar Composer has all features enabled and can output audio file to iTunes. These files are limited in size until the application is registered. The easiest way to register is online at:
