

## Productivity Software Descriptions

### MacAddict January 2007

#### **Data Guardian 1.0.4** *trial*

Koingo Software, [main@koingosw.com](mailto:main@koingosw.com), <http://www.koingosw.com>

**Requirements: Mac OS 10.2 or later**

Data Guardian is the merger and successor of two of Koingo Software's previous products: Contact Keeper and Password Retriever. With the power of both of these products combined, you now have the flexibility of importing a wide range of data, dialing phone numbers, composing e-mails, launching Web URLs, auto-filling forms in Safari, inserting pictures into records, and printing records in an easy to read graphical format.

#### **Diet Sleuth 4.6.0** *trial*

Black Cat Systems, <http://www.blackcatsystems.com>

**Requirements: Mac OS 10.3 or later**

Diet Sleuth allows you to keep track of what foods you eat each day, and their nutritional value. For each day, you select the foods you have eaten, and the number of servings of each.

#### **Geo-Calc 2.0** *shareware*

BaldGeeks, [info@baldgeeks.com](mailto:info@baldgeeks.com), <http://www.baldgeeks.com>

**Requirements: Mac OS 10.3.9 or later**

Unlike other geometry calculators, Geo-Calc serves as a great learning tool by offering 2D and 3D representations of the various shapes that are commonly encountered, therefore helping you to better visualize the shapes. Additionally, the application includes an extensive amount of help, provided through the Apple Help Viewer and also from within the application.

#### **iValet 1.0.2** *shareware*

ZiggySoft Software, <http://www.ziggy-soft.com>

**Requirements: Mac OS 10.4 or later**

An all-in-one application solution to eliminate the need for multiple applications including calendars, clip collectors, calculators, notebooks, and several other small tools.

#### **Microsoft Office 2004 Test Drive**

Microsoft, <http://www.microsoft.com/mac>

**Requirements: Mac OS 10.2.8 or later**

When you're ready to get down to business, Microsoft Office 2004 for Mac provides the intuitive, intelligent tools you need to transform your ideas and opportunities into action. Microsoft Office 2004 for Mac is

designed to give you access to your ideas and information from every power-packed productivity application in the suite. Thanks to input from thousands of Mac users, Office 2004 contains tools that are more integrated and intuitive than ever.

### **Mori 1.4** *demo*

Hog Bay Software, <http://www.hogbaysoftware.com>

**Requirements: Mac OS 10.4 or later**

This digital notebook makes it easy to record and organize your notes.

### **OmniGraffle 4.1.2** *trial*

The Omni Group, [info@omnigroup.com](mailto:info@omnigroup.com), <http://www.omnigroup.com>

**Requirements: Mac OS 10.3 or later**

Move your whiteboard to your Mac. OmniGraffle helps you draw beautiful diagrams, family trees, flow charts, org charts, layouts, and other directed or nondirected graphs. If you want to organize anything graphically using boxes and lines, OmniGraffle is your tool.

### **OmniOutliner 3.6.1** *demo*

The Omni Group, [info@omnigroup.com](mailto:info@omnigroup.com), <http://www.omnigroup.com>

**Requirements: Mac OS 10.3.9 or later**

OmniOutliner has just what you need for outlining and organizing information. It's perfect for notetaking, to-do lists, school projects, budgeting, project management, and much more. OmniOutliner lets you set up a hierarchy of main headings and subpoints that can be expanded and collapsed as desired, and create multiple columns related to each topic. Other features include smart checkboxes, customizable popup lists, and an innovative styles system.

### **Opal 1.0** *trial*

A Sharp, [david@a-sharp.com](mailto:david@a-sharp.com), <http://www.a-sharp.com>

**Requirements: Mac OS 10.4 or later**

Replacing the venerable Acta outliner, Opal lets you organize lists, track projects, take notes, and store information in an outline. It's easy to reorganize, and also easy to hide information that's not currently of interest. Writers will appreciate its word count, and the ability to export to Microsoft Word. Planners can make use of numeric sorting and smart checkboxes that track task completion automatically. And Opal comes with complete documentation so you can look something up when you're not online.

### **PDFpen 3.0.2** *demo*

SmileOnMyMac, [info@smileonmymac.com](mailto:info@smileonmymac.com),

<http://www.smileonmymac.com>

**Requirements: Mac OS 10.2.5 or later**

PDFpen is an affordable PDF-editing tool for the Mac. With this powerful tool, you can modify original text using automatically generated text blocks that can be corrected and edited. PDFpen 3.0 also features new image-editing capabilities: You can now move, resize, copy and delete images from the original PDF. Other enhancements include increased speed and multiple-column text selection.

### **Presentation Prompter 4.2** *demo*

NextForce Software, [prompter@nextforcesw.com](mailto:prompter@nextforcesw.com),

<http://www.nextforcesw.com>

**Requirements: Mac OS 10.2 or later**

Speakers, actors, reporters, singers, and narrators can use Presentation Prompter with their Mac from practice to production. Presentation Prompter incorporates a variety of features including fully-styled text, forward and reverse scrolling, scrollwheel fast-forward and rewind, bookmarks to jump to a specific part of a script, single-screen mirroring for use with mirror enclosures, powerful script-editing features, and a beautiful aqua interface. The software can also be adapted to work with a variety of production styles and has customizable hotkeys and preferences to automate common operations.

### **RapidoWrite 2.1** *freeware*

App4Mac, <http://www.app4mac.com>

**Requirements: Mac OS 10.3.9 or later**

When you are writing text, you probably find yourself typing the same text again and again. Whether this is your name, your email address, the URL of your blog, your personal address, and so on RapidoWrite is here to save time by "typing" these frequently used text snippets for you. You just define your list of abbreviations, and RapidoWrite will automatically show you related texts as you type.

### **TinyBooks 4.0.1** *demo*

Space-Time Associates, <http://www.winograd.com>

**Requirements: Mac OS 10.2 or later**

TinyBooks is the simplest way to handle the books for most small companies. You enter your expenses and income, and TinyBooks does the rest. Current and year-to-date "on-the-fly" totals are continually displayed. Fully automatic bar-charting of all expense and income accounts make the determination of monthly trends intuitively obvious.
