Samples scripts documentation

In this folder, four scripts are given. Here is a quick description of their functionalities. If you want to use them, just copy them to your hard disk, select one in iBeeZz and try !

Time to wake up ! :

When selecting this script in iBeeZz, your Mac will wake you up saying "Good morning Olivier. It's time to wake up and make your bed! Can you hear me? Oh my god, you seem to be really asleeped... Wake up now. I gonna make you a coffee!". You can replace the text just by double-clicking the script file.

Create a new AppleWorks document :

When selecting this script in iBeeZz, your Mac will create a new AppleWorks document on wake up.

Play music in iTunes and Play music in Whamb :

When selecting this script in iBeeZz, your Mac will wake you up by playing music in the corresponding music player (See http://www.whamb.com for more information about Whamb).
If, when executing the script, the corresponding application has been previously launched, the selected song will be played. Otherwise, the audio player will play the first song of the main playlist.

Check mails :

When selecting this script in iBeeZz, Mail will check for new e-mails on wake up.
