Frequently Asked Questions

Q: Can Xinema play DivX movies?
A: Yes, if you have the DivX codec for QuickTime. Download it from divx.com. As a general rule, movies that play in QuickTime player works with

Xinema.

Q: Can I watch Steve Jobs' Keynote (and other streaming movies) in Xinema?
A: Yes, if you have a QuickTime movie pointing to the stream (a reference file).
　　You can make reference files with QuickTime Pro, by opening the stream and saving it 'normally'.

Q: Can I use Xinema in Mac OS 9?
A: Sorry, Xinema works only with Mac OS X 10.1.5 or later. (10.2.x is recommended)

Q: How much is Xinema?
A: Xinema is freeware. If you wish, you can donate us money. For more info, visit our homepage.

Q: I have found a bug in Xinema. Where can I report it?
A: Please report all bugs and suggestions by emailing us at support@lightheadsw.com
