Thanks for giving **Photo Layout** a try, I hope you enjoy using it.

To install **Photo Layout** simply drag the application, that's the item titled "**Photo Layout**" which is below this Read Me document, to your Applications folder.

You should also copy the "For Tutorial - See Instructions" folder on to your hard disk in a convenient location. You'll need this folder if you perform the tutorials.

After you drag "**Photo Layout**" to your Applications folder you can then put both "**Photo Layout Volume**", and "photolayout.dmg" file in the Trash, both items are no longer needed. Do this when "**Photo Layout**" is not running.

You may also want to drag the **Photo Layout** icon to your Dock for easy access.

You have the complete **Photo Layout** program. Everything in the program is working except for two limitations, when you print, you'll see "Photo Layout - Purchase Today" printed over your design, and you are limited to a 15 day trial period.

After a 15 day trial period you will be asked to purchase **Photo Layout** for continued use.

Purchase **Photo Layout** and you will be able to print normally and have unlimited access to the program.

Photo Layout is \$49.95.
