

MediaCentral 1.2.1

Introduction

MediaCentral turns your Mac into the ultimate home theater system. With support for numerous audio, video and multimedia formats, MediaCentral brings it all together at the push of a button.

Changes in Version 1.2.1

- New: MediaCentral supports the Apple Remote (Due to the lack of support for Apple Remote development, there may be a reoccurrence of the last function performed with the Apple Remote upon quitting MediaCentral).
- New: Universal Binary allows MediaCentral to operate natively on both PowerPC and Intel Macs. WebTV will be limited until universal binaries for RealPlayer and Microsoft Mediaplayer become available.
- Improved: MPEG2 video playback performance and efficiency have been enhanced
- Improved: Quicktime plug-in now supports multiple audio tracks
- Fixed: Various minor bugs have been resolved and overall performance has been enhanced

System Requirements

- Apple Macintosh G4 800Hz or Intel Mac
- Mac OS X 10.4 or higher
- An active internet connection
