Advanced Link Manager 2.1

trial

Caphyon LLC, support@advancedlinkmanager.com, <http://www.advancedlinkmanager.com>

Requirements: Mac OS 10.2 or later

Advanced Link Manager helps you monitor your Web site's incoming links, keeping you informed as to where they come from and what their content is. With Advanced Link Manager, you can also track your backlinks' evolution in time. Some domains have various links to your site, distributed on various pages belonging to that domain, of which only a few bring you relevant traffic. You should be interested that these important links stay where they are, so tracking their status becomes a necessity. Advanced Link Manager does this for you automatically, through its ability to create updatable reports and meaningful graphical charts.

ConceptDraw WebWave

trial

CS Odessa, <http://www.conceptdraw.com/en>

Requirements: Mac OS 10.1.5 or later

ConceptDraw WebWave is specially designed for professional Web designers, Webmasters, developers, and architects to use for Web site and application prototyping, design, page mockup, and site mapping. It includes more than 4,590 ready-made graphics, shapes, templates, and wizards for quickly creating professional diagrams and drawings.

Cyberduck 2.5.5

freeware

David V. Kocher, feedback@cyberduck.ch, <http://cyberduck.ch>

Requirements: Mac OS 10.3.9 or later

Cyberduck is an open-source FTP and SFTP (SSH Secure File Transfer) browser licenced under the GPL with an easy-to-use interface, integration with external editors, and support for many Mac OS X system technologies such as Spotlight, Bonjour, the Keychain, and AppleScript.

EvoCam 3.6

trial

Evological, info@evological.com, <http://www.evological.com>

Requirements: Mac OS 10.4 or later, QuickTime 7 or later

EvoCam is advanced Webcam software for Mac OS X. Use EvoCam to publish a Webcam with streaming video, view and record video from network cameras and video servers, create timelapse movies, or use it as part of your home security system with its configurable motion sensors--these are just a few of the things you can do with this powerful, easy-to-use Webcam software.

Feeder 1.3

trial

Reinvented Software, info@reinventedsoftware.com, <http://www.reinventedsoftware.com>

Requirements: Mac OS 10.3.9 or later, QuickTime 7 or later

Feeder is an application for creating and publishing RSS feeds, including iTunes-compatible podcasts. Version 1.3 features the ability to tag audio and video podcast files, image uploading, more-flexible publishing, and many other new features and improvements. Feeder makes working with RSS as straightforward as writing email and is packed with

thoughtful features to ease the experience of creating and managing feeds from start to finish, including auto-completion, templates, automatic dates, HTML editing, and previews.

Freeway 4 Pro

trial

Softpress, <http://www.softpress.com>

Requirements: Mac OS 10.2.8 or later

Freeway 4 Pro is developed to meet the needs of professional designers who require an intuitive tool for creating sophisticated and highly functional Web sites without the hassle of coding. It provides a full-featured, intuitive user interface that makes expert Web-site design more accessible.

Google Maps Plugin 2.3

donationware

Brian Toth, btsoft@speakeasy.net, <http://www.briantoth.com>

Requirements: Mac OS 10.3 or later, Apple Address Book

The Google Maps Plugin enables you to lookup your Apple Address Book addresses using Google Maps as well as get directions between your Address Book addresses. As of this writing, Google Maps supports street maps for the United States, UK, Canada, and Japan.

iGlasses 1.3.3

demo

Ecamm Network, ken@ecamm.com, <http://www.ecamm.com>

Requirements: Mac OS 10.3 or later (Mac OS 10.2.x with QuickTime 6.4)

iGlasses lets users adjust and manipulate iSight video settings from within iChat and many other supported programs. New in version 1.3 is support for the MSN clients aMSN and Mercury Messenger. Also new is the ability to rotate the iSight's image 90 degrees, allowing for mounting of the iSight on the side of a display.

Netflix Freak 2.3

trial

The Little App Factory, <http://www.thelittleappfactory.com>

Requirements: Mac OS 10.2.6 or later

Netflix Freak is a full-featured Mac OS X application that enhances your Netflix experience by allowing you to manage your rental queue. The app offers many unique features not available on the Netflix Web site.

OmniWeb 5.1.3

trial

The Omni Group, omniweb@omnigroup.com, <http://www.omnigroup.com>

Requirements: Mac OS 10.2.8 or later

OmniWeb is a fully featured, great-looking native Web browser for Mac OS X. Highly multithreaded and written using Apple's advanced Cocoa framework, OmniWeb also obstructs pop-up ads, searches by keyword through your history, updates your bookmarks, and checks the spelling in your Web forms.

RCDefaultApp 2.0

freeware

Rubicode, info@rubicode.com, <http://www.rubicode.com>

Requirements: Mac OS 10.2 or later

RCDefaultApp is a Mac OS X preference pane that allows a user to set the default application used for various URL schemes, file extensions, file types, MIME types, and Uniform Type Identifiers (UTIs, Mac OS 10.4 only). Mac OS X uses the extension and file

type settings to choose the application when opening a file in Finder, while Safari and other applications use the URL and MIME type settings at other times for content not related to a file (such as an unknown URL protocol, or a media stream).

Webstractor 1.6

trial

Softchaos, Ltd., naomi@well.com, <http://www.softchaos.com>

Requirements: Mac OS 10.3 or later

Intuitive and powerful, Webstractor takes Internet users beyond browsing to provide the ability to capture multiple Web pages, remove unwanted content, annotate, organize, retrieve, and assemble the found materials into effective documents.
