**Consultez le site pour des informations régulièrement mises à jour:**

**<http://www.ecamm.com/mac/iglasses>**

### **Description:**

IGlasses vous donne le contrôle des différents réglages vidéo de votre iSight pour iChat AV ou d'autres logiciels vidéo. Choisissez directement un des pré-réglages fourni ou ajustez manuellement. IGlasses permet également de faire fonctionner votre iSight avec des mac équipés de processeur G3 inférieurs à 600Mhz (limitation Apple).

### **Nécessite:**

- \* Mac OS X 10.3 ou supérieur ou 10.2 avec QuickTime 6.4
- \* iChat AV (2.0 ou supérieur) ou l'une des applications video listé ci-dessous.
- \* Une webcam **iSight ou iBot FireWire.**

### **Au programme:**

*Réglages IGlasses:*

Cliquez sur le logo vert de la caméra pour ouvrir la fenêtre de prévisualisation. Choisissez une pré réglage dans le menu IGlasses. Accédez à la fenêtre de configuration des réglages IGlasses en choisissant "réglages IGlasses" dans le menu Vidéo.

presets.jpg "

**Standard:** Choisissez cette option pour revenir aux réglages d'usine normaux.

**Extra lumineux:** Produit une image plus lumineuse pour "chatter" dans des conditions d'éclairage plus difficiles que d'ordinaire.

**Méga lumineux:** Encore plus de luminosité dans ce mode, pour utiliser quand il fait noir dans la pièce.

**Amélioré:** l'image gagne en netteté et en saturation de couleurs.

**Noir et blanc:** Pour un effet "artistique" en N&B.

**Sepia:** Pour un effet sépia d'antan.

**Couleurs en délire:** Pour le fun! choisissez parmi les couleurs de l'arc en ciel... effet WZZZZZZZZ garantie

**Vision nocturne:** Pour "chatter" dans le noir absolu!

**Mode macro:** Permet d'activer le mode macro de votre caméra... soyez plus

proche d'elle ;)

**NOTE:** Some cameras will display a different set of available presets. The presets are based on camera capability. For example, the "built-in iSight" does not have "Macro Focus" because that camera doesn't have the ability to control focus.

*Plus de réglages:*

Cliquez sur "plus de réglages" pour accéder aux réglages manuels.  
french.jpg "

Sélectionnez une option dans le menu déroulant pour affiner le réglage.

*Mémoriser réglage personnalisé:*

Cliquez "Mémoriser réglage personnalisé" pour sauvegarder vos paramètres lors d'une prochaine utilisation; vos réglages seront disponibles dans le menu iGlasses, sous ceux fournis d'origine.  
custom.jpg "

*Effet "Faire pivoter" et miroir:*

En cochant l'option "Faire pivoter", vous décidez d'inverser l'image. utile dans certains cas (montage de l'iSight à l'envers, au plafond,etc.)

Vous pouvez aussi utiliser l'effet miroir.

### **Applications compatibles avec cette version:**

- Apple iChat AV 2.0 or higher
- Apple iMovie 4.0 and iMovie HD
- Apple PhotoBooth
- Apple QuickTime 7 Pro Player
- Apple QuickTime Broadcaster
- Apple Safari (for use with Web-based chat)
- iSpQ 6.3.1 or higher
- Yahoo! Messenger 2.5.3 or higher (with OS X 10.3 or higher)
- EvoCam 3.5 Preview 1 or higher
- GCam 1.2 or higher
- iVisit
- vChat
- iCamShare
- ohphoneX

- ineen
- BTV and BTV Pro
- SecuritySpy\*
- WuffCam
- Blog.Mac
- iStopMotion
- iVeZeen
- MülleSight
- aMSN
- Mercury

\* Rotate, Mirror, and some effects not supported in SecuritySpy.

### **Installation:**

1. Quittez iChat si il est toujours activé.
2. Lancez l'installateur de iGlasses.
3. Cliquez sur "installer" et suivez les instructions.
4. Vous devriez voir apparaître la fenêtre iGlasses quand l'iSight est connecté.

### **Pour désinstaller:**

1. Quittez iChat si il est toujours activé.
2. Lancez l'installateur de iGlasses.
3. Cliquez sur "désinstaller" et suivez les instructions.

### **Details:**

L'installateur de iGlasses ne modifie pas iChat directement. Les fichiers sont installés dans:

/Library/InputManagers/Ecamm  
/Library/Components/

### **Historique des versions:**

3/28/06 - v1.3.3: Adds the ability to use iGlasses in non-native applications running on an Intel-based Mac. Fixes a problem with using iGlasses in combination with both ShowMacster and the built-in iSight. Fixes a problem which could cause a crash when using iGlasses on a MacBook Pro. Fixes a problem where the iGlasses window could not be accessed during capture from iSight when using iMovie 6. Fixes a problem where Crazy Colors would stop cycling during capture from iSight when using iMovie 6.

2/15/06 - v1.3.2: Fixes a problem which could cause a crash when using iGlasses with aMSN. Fixed a problem which could cause flickering when using iGlasses with BTV or BTV Pro.

2/14/06 - v1.3.1: Fixes a problem which prevented the iGlasses Settings menu item from appearing in some applications. Fixes a problem which could cause a crash in BTV. Fixes a problem with using the external iSight on an Intel based Mac.

2/13/06 - v1.3: Adds universal support for Macs with an Intel processor. Adds rotate option to allow for turning your image 90 degrees. Adds Colorize setting and Sepia option for built-in iSight. Adds iGlasses support for aMSN, Mercury, and MülleSight. Other bug fixes and improvements. iGlasses v1.3 Demo resets the demo period, allowing for users who tried earlier versions to have a new trial.

12/23/05 - v1.2.2: Fixes a problem where the picture from the "built-in iSight" may appear different from how it looked when not running iGlasses. Fixes a minor issue with selecting custom presets.

12/16/05 - v1.2.1: Fixes an incompatibility with ShowMacster.

12/16/05 - v1.2: Adds support for "built-in iSight". Adds support for Upside Down and Mirror to all supported video applications.\* Adds support for PhotoBooth. Adds White Balance adjustment slider for original iSight. Fixes some problems with remembering whether the iGlasses window was opened or closed. Adds new settings for Threshold effect, SW Brightness, and SW Contrast. Adds support for WuffCam, Blog.Mac, iStopMotion, and iVeZeen. iGlasses v1.2 demo resets the v1.1 trial, allowing for a new trial period.

7/11/05 - v1.1.4: Fixes bug where iGlasses caused EvoCam and other programs not to save preference settings. Removes support for Delicious Library because it was causing problems for some users.

6/10/05 - v1.1.3: Adds check-mark next to currently selected setting in iGlasses menu. Adds better compatibility with ShowMacster. Adds iGlasses settings support for iMovie HD, QuickTime 7 Pro recording, ohphoneX, Delicious Library, ineen, BTV, BTV Pro, and SecuritySpy. Fixes a bug where iChat new user setup could hang when a camera is attached. Fixes a problem where G3 computers that fall below the minimum system requirements for video conferencing would not be enabled when running OS X 10.4 and iChat 3. Fixed a bug where recording in EvoCam could cause iGlasses to stop working. Adds Japanese README file. Fixes a problem with the installer which caused it to not work on some systems. Fixes a bug which could cause video settings to not be restored between application launches.

1/30/05 - v1.1.2: Adds support for iCamShare. Adds Japanese and Danish (Dansk) language. A more thorough fix for a bug which caused iGlasses to crash or hang after using iMovie. Fixes a bug which caused Safari to crash if iChat AV was not installed. Fixes a problem which caused Cocoa applications running as root with the user bit set to fail to launch when iGlasses is installed. Fixes a problem where the iGlasses window position could be off-screen. Fixes a problem with the installer which caused it to not work on some systems.

1/4/05 - v1.1.1: Adds support for vChat. Adds support for web-based video chats in Safari. Adds Italian, Dutch (Nederlands) , Finnish (Suomen), Swedish (Svenska), and Spanish language. Fixes a bug which caused iGlasses to crash or hang when in iChat after using iMovie.

11/17/04 - v1.1: Adds support for the following video applications: iMovie 4, QuickTime Broadcaster, iSpQ, Yahoo! Messenger, GCam, iVisit, and EvoCam. Adds new presets for the iBot FireWire camera. Crazy Colors now cycles through the rainbow of colors. Adds the ability to flip the video image upside down or mirrored (iChat only). Adds German localization. Fixes a bug where the presets showed up as French in all non-English languages. Fixes a bug where the iGlasses window did not show up correctly in the Windows menu. Changed the behavior of the demo messages. Fixed a bug where the installer would not work correctly if you're logged in as root. Fixes a problem where video settings might not have worked as expected. For iSight, White Balance has been removed from the feature menu. Auto White Balance is in effect unless Temperature is turned on. Also, the Exposure slider has been removed. The same effect can be achieved using the Shutter and Gain controls. If Shutter and Gain controls are turned off, then manual exposure will take over. Fixes an interface problem with OS X 10.2. iGlasses v1.1 resets the v1.0 trial, allowing for a new trial period.

10/1/04 - v1.0.1: Fixes a UI issue which caused iGlasses to incorrectly report that "Video source is not an iSight" in some situations.

10/1/04 - v1.0: Sortie de la premiere version.
